A Monthly Data Review from the Railroad Commission of Texas ■ October 2015

HIGHLIGHTS

Natural Gas Production

In July 2015 Texas natural gas production was 656.85 billion cubic feet (bcf), down from 736.72 bcf produced during the same month in 2014. *(Note: Recent oil and gas production data are considered preliminary, incomplete, and subject to revision. As of July 2015 the Railroad Commission of Texas discontinued the Production Adjustment Factor.)*

Crude Oil Production

In July 2015 Texas crude oil production averaged 2.456 million barrels per day (mmb/d), down from 2.710 mmb/d reported during the same month in 2014. *(See Note above.)*

Rotary Rigs Operating in Texas

In September 2015 the average Texas rotary rig count was 367, down from 902 rigs running during the same month last year. The September rig count was down from the August rig count of 385.

Source: Baker Hughes Inc.

Permits to Drill

In September 2015 the Railroad Commission issued 906 original permits to drill, down from 3,013 permits issued during the same month last year and up from 864 permits issued in August.

Oil and Gas Well Completions

In September 2015 operators reported 1,153 oil completions, down from 2,048 oil completions during the same month last year. There were 284 gas completions in September, down from 328 gas completions reported during the same month last year. There were 1,441 wells drilled in Texas in September, down from 2,377 wells drilled during the same month last year.

TRENDS

EIA Short-Term Outlook for Crude Oil and Natural Gas:

The average price of imported crude for U.S. refiners (an indicator of world oil prices) is expected to decrease from the average 2014 level of \$89.63 per barrel to \$41.84 per barrel during the 4th quarter of 2015 and average \$47.19 for the year, according to the U.S. Energy Information Administration's (EIA) "Short-Term Energy Outlook" for October 2015.

The West Texas Intermediate spot average is expected to decrease from the 2014 average level of \$93.17 per barrel to \$45.34 per barrel during the 4th quarter of 2015 and average \$49.53 for the year.

U.S. petroleum demand is expected to increase 1.73 percent from 2014 to 2015 to 19.44 million barrels per day and increase 0.77 percent from 2015 to 2016 to 19.59 million barrels per day.

U.S. natural gas demand is expected to increase 4.17 percent from 2014 to 2015 to 27.81 trillion cubic feet, and is expected to increase by 0.24 percent from 2015 to 2016 to 27.88 trillion cubic feet.

EIA projects that natural gas Henry Hub spot prices will average \$2.83 per mmbtu for the 4th quarter of 2015 and average \$2.81 per mmbtu for the year. This is a 35.99 percent decrease from EIA's 2014 Henry Hub spot price of \$4.39 per mmbtu. *(Note: Beginning January 2013 EIA discontinued publishing wellhead prices and began publishing a natural gas spot price at the Henry Hub.)*

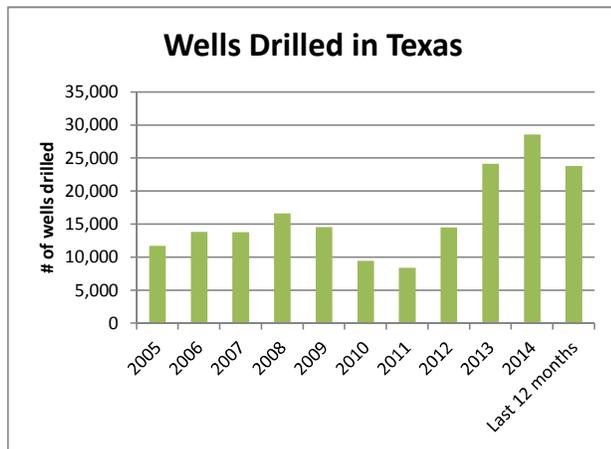

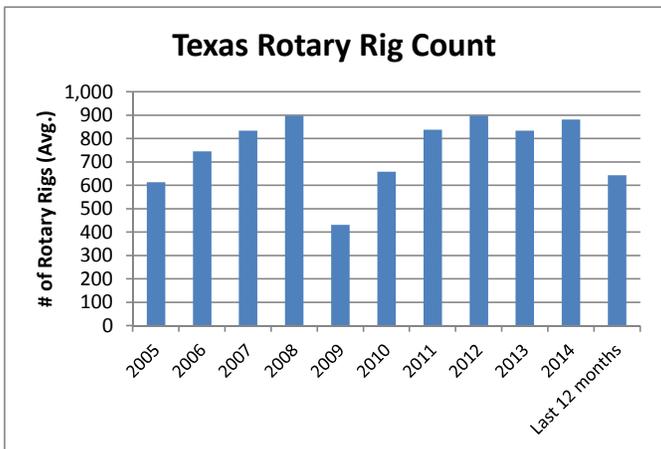

EIA projects a natural gas Henry Hub spot price of \$3.05 per mmbtu for 2016, a 8.54 percent increase from the \$2.81 projected average price for 2015. *(See note above.)*

* Sources: U.S. Energy Information Administration (EIA). Recent production data is subject to revision.

** Source: EIA. Wells drilled includes crude oil, natural gas, and dry wells drilled. U.S. average wellhead (first purchase) price is dollars per barrel. (Per most recent data from EIA)

Source: EIA. Petroleum products supplied is a measure of domestic consumption.

Railroad Commission of Texas

P. O. Box 12967

Austin, Texas 78711-2967

Texas PetroFacts is available in PDF format for download from the Railroad Commission web site at <http://www.rrc.texas.gov>.

Created in 1891 by the Texas Legislature, the Railroad Commission today is known principally as a leader in the regulation and conservation of oil and natural gas in Texas. For more than 100 years, the Commission has been charged with preventing waste and pollution while safeguarding property rights.

We believe the people of Texas continue to have a vital stake in the orderly production and conservation of the state's natural resources. Across the state, crude oil and natural gas are produced in 217* of 254 counties. About 274,500* persons are employed in oil and gas exploration, production, refining, and related industries. In all, businesses involved with the Texas oil and gas industry contribute about \$206 billion annually to the state's more than one trillion-dollar economy.

As an oil and gas producer, the state of Texas ranks among the nations of the world. Texas leads the United States in the production of crude oil and natural gas, and its marketed production of natural gas represents one-third of total U. S. supply. Texas produces an average of nearly two million barrels of oil a day; natural gas production in the state exceeds 8 trillion cubic feet a year.
