

RAILROAD COMMISSION OF TEXAS
Oil and Gas Division

NOTICE TO OIL AND GAS OPERATORS

Waste Hauler Use of Authorized Disposal Systems

Due to the circumstances related to extreme severe weather and an immediate need for energy sources for power generation, all waste hauler permits are hereby temporarily modified as follows:

The permittee may use commission-permitted disposal systems not identified on the attachment to the permit so long as the permittee has obtained permission from the disposal system operator to use the disposal system. The permittee is authorized to use commission-permitted disposal systems not identified on the permit attachment for through February 28, 2021.

No less than fourteen (14) days after the date of this notice, the permittee must submit a list of the commission-permitted disposal systems not identified on the permit attachment that the permittee utilized through February 28, 2021.

Notwithstanding the foregoing, the above-referenced temporary permit modification in no way authorizes the permittee to use a disposal system for which the permittee has not obtained permission from the disposal system operator to use the system.

If you have any questions, please contact the Environmental Permits & Support Unit at Enviro.Permits@rrc.texas.gov or 512-463-7371 or 512-463-3840.
