# Project Abstract Summary

This Project Abstract Summary form must be submitted or the application will be considered incomplete. Ensure the Project Abstract field succinctly describes the project in plain language that the public can understand and use without the full proposal. Use 4,000 characters or less. Do not include personally identifiable, sensitive or proprietary information. Refer to Agency instructions for any additional Project Abstract field requirements. If the application is funded, your project abstract information (as submitted) will be made available to public websites and/or databases including USA Spending.gov.

**Applicant Name**

Railroad Commission of Texas

**Descriptive Title of Applicant's Project**

Railroad Commission of Texas Abandoned Oil and Gas Well Plugging Program Phase I Formula Grant

**Project Abstract**

The Railroad Commission of Texas (RRC) is seeking Formula Grant Phase I funding under Sec. 40601 of the Infrastructure Investment and Jobs Act (2021) to plug, remediate, and reclaim orphaned wells located on State-owned or privately owned land across Texas. The Commission is the state agency with primary regulatory jurisdiction over the oil and natural gas industry with environmental and safety responsibilities related to oil and gas production. Protecting the environment and preserving natural resources by regulating fossil fuel energy production, storage, and delivery is one of the agency's primary goals.

The Commission began its statewide well plugging program in 1984 seeking to alleviate water quality problems associated with oil and gas production. With funding from the Formula Grant Phase I, the Commission will build on this nearly 40-year history. The Commission defines an orphaned well as an inactive, non-compliant well that has been inactive for a minimum of 12 months, and the responsible operator's Organizational Report—an operator's registration with the Commission—is delinquent for greater than 12 months. In 2001, the Commission established a Well Plugging Priority System to prioritize plugging those orphaned wells that pose a high risk to the environment by assigning numerical values to factors in four categories: well completion, wellbore conditions, well location with respect to sensitive areas, and unique environmental, social, or economic concern.

Upon enactment of the Infrastructure Investment and Jobs Act, there were 7,396 documented orphaned wells in Texas. As of August 31, 2023, the number of documented orphaned wells in Texas increased to 7,887. This project will improve environmental outcomes across the state of Texas by eliminating the potential threat of pollution from documented orphaned wells—be it from the emissions of methane and other gases to the contamination of surface or groundwater as more than 1,800 documented orphaned wells across the state will be plugged with Formula Grant Phase I funding, including several hydrogen sulfide wells. The Commission will use 90 percent of its Formula Grant Phase I funding request for contracted well plugging services and site remediation at those well plugging sites that require remediation beyond the typical activities conducted during the well plugging process.

With Formula Grant Phase I funding the Commission estimates adding plugging inspectors who will be located across the state throughout the Commission's 12 districts. Plugging inspectors are on-site representatives of the Commission during plugging activities to witness all plugging operations to ensure protection of the state's usable quality water. Inspectors also confirm contract stipulations are followed, and costs align correctly with the work performed.

The Commission developed a website that includes up to date information about Section 40601 implementation efforts. The website will be updated regularly as Formula Grant Phase I funding activities begin. The Commission will transition to the Council on Environmental Quality's Climate and Environmental Justice screening tool to identify those orphaned wells that affect a disadvantaged community, with wells selected for plugging following the Commission's Well Plugging Priority System.

**Instructions:** State Formula Grant application work plan/proposals should thoroughly address each element in the published Phase 1 State Formula Grant Guidance Section IV.C.v., as well as the Standards for Measurement, Plugging, Remediation, and Workforce described in Section V of the guidance. **This template is provided as an optional tool to assist States in preparing a work plan/proposal that addresses the required elements in the published guidance. States are not required to use this template in preparing their applications, however, if they do not use this template, they should take care to review their work plan/proposal to ensure it addresses each required element of the published program guidance.** A project proposal and detailed work plan must be submitted with the Standard Form (SF) 424 Application for Federal Assistance with all application submissions. Please carefully complete each section below. Use additional sheets as needed. Please use at least an 11-point font.

The template outline of suggested sections in the work plan/proposal is shown in black font. The *green font portion* provides descriptions of the information that should be included within each section and covers all of the required elements of the program guidance. References to the specific subsection of the program guidance to be addressed are also included within each section of the template.

Person Submitting Proposal: Colleen Forrest

Date: 9/21/23

Announcement ID: **D-AQD-FA-24-003-107445 / D-AQD-FA-24-003**

Applicant Project/Program Title Railroad Commission of Texas Abandoned Oil and Gas Well  
(specific to your project): Plugging Program Phase I Formula Grant

Estimated Period of Performance: 12/1/2023 to 11/30/2026

Proposed Project Location: Austin, TX (Administratively); Statewide (Programmatically)

PROJECT/PROGRAM ABSTRACT: (Include completed Form OMB 4040-019 with Application)

*Prepare a project abstract of not more than one page that will include the project purpose, activities to be performed, expected deliverables or outcomes, intended beneficiaries, and subrecipient activities (if known). The abstract should be included in a completed Form OMB 4040-019 and is limited to 4,000 characters or less. [Formula Grant Guidance Section IV.C.iv.]*

The Railroad Commission of Texas (RRC) is seeking Formula Grant Phase I funding under Sec. 40601 of the Infrastructure Investment and Jobs Act (2021) to plug, remediate, and reclaim orphaned wells located on State-owned or privately owned land across Texas. The Commission is the state agency with primary regulatory jurisdiction over the oil and natural gas industry with environmental and safety responsibilities related to oil and gas production. Protecting the environment and preserving natural resources by regulating fossil fuel energy production, storage, and delivery is one of the agency's primary goals.

The Commission began its statewide well plugging program in 1984 seeking to alleviate water quality problems associated with oil and gas production. With funding from the Formula Grant Phase I, the Commission will build on this nearly 40-year history. The Commission defines an orphaned well as an inactive, non-compliant well that has been inactive for a minimum of 12 months, and the responsible operator's Organizational Report—an operator's registration with the Commission—is delinquent for greater than 12 months. In 2001, the Commission established a Well Plugging Priority System to prioritize plugging those orphaned wells that pose a high risk to the environment by assigning numerical values to factors in four categories: well completion, wellbore conditions, well location with respect to sensitive areas, and unique environmental, social, or economic concern.

Upon enactment of the Infrastructure Investment and Jobs Act, there were 7,396 documented orphaned wells in Texas. As of August 31, 2023, the number of documented orphaned wells in Texas increased to 7,887. This project will improve environmental outcomes across the state of Texas by eliminating the potential threat of pollution from documented orphaned wells—be it from the emissions of methane and other gases to the contamination of surface or groundwater as more than 1,800 documented orphaned wells across the state will be plugged with Formula Grant Phase I funding, including several hydrogen sulfide wells. The Commission will use 90 percent of its Formula Grant Phase I funding request for contracted well plugging services and site remediation at those well plugging sites that require remediation beyond the typical activities conducted during the well plugging process.

With Formula Grant Phase I funding the Commission estimates adding plugging inspectors who will be located across the state throughout the Commission's 12 districts. Plugging inspectors are on-site representatives of the Commission during plugging activities to witness all plugging operations to ensure protection of the state's usable quality water. Inspectors also confirm contract stipulations are followed, and costs align correctly with the work performed.

The Commission developed a website that includes up to date information about Section 40601 implementation efforts. The website will be updated regularly as Formula Grant Phase I funding activities begin. The Commission will transition to the Council on Environmental Quality's Climate and Environmental Justice screening tool to identify those orphaned wells that affect a disadvantaged community, with wells selected for plugging following the Commission's Well Plugging Priority System.

*The proposed work plan outline topics listed in this section cover all of the required elements of the Work Plan as described in the Phase 1 State Formula Grant Guidance (FGG) Section IV.C.v., as well as the Standards for Measurement, Plugging, Remediation, and Workforce described in Section V. of the program guidance. Each section below identifies the specific subsections of the program guidance where the elements included in each topic are described.*

**Orphan Well Program Description [FGG Sections IV.C.(d), IV.C.v.(a).1, V.B.i, IV.C.v.(a).6, IV.C.v.(a).5, IV.C.v.(i), and IV.C.v.(j)]**

*Provide a description of the State program for orphaned well plugging, remediation, and restoration, including legal authorities, processes the State currently uses to identify and prioritize orphaned wells, procurement mechanisms, and other program elements demonstrating the readiness of the State to carry out proposed activities using the grant, including summary descriptions of [FGG Section IV.C.v.(a).1.]:*

- *the definitions and processes used by the State to formally identify a well as— a. an orphaned well; or if the State uses different terminology, otherwise eligible for plugging, remediation, and reclamation by the State. [FGG Section IV.C.(d)]*
- *the State's plugging standards, including the witnessing requirements (qualifications of witnesses, documentation); If the state has no plugging standards, describe how the work performed will reflect, at a minimum the Bureau of Land Management's Onshore Oil and Gas Order No. 2 Section III.G for plugging wells, [https://www.blm.gov/sites/blm.gov/files/energy\\_onshoreorder2.pdf](https://www.blm.gov/sites/blm.gov/files/energy_onshoreorder2.pdf); or, for offshore wells, the provisions of 30 CFR Part 250. [FGG Sections IV.C.v.(a).1.a. & V.B.i.]*
- *how salvaged material and equipment will be reused, recycled, or sold for scrap (with any resulting income reported to DOI and incorporated into the grant budget for eligible activities upon approval by DOI); [FGG Section IV.C.v.(a).1.b.]*
- *the State's authorities to enter private property, or a State's procedures to obtain landowner consent to enter such property, and in the event that any wells to be plugged will be accessed from Federal or Tribal land, how the State will gain access; [FGG Section IV.C.v.(a).1.b.]*
- *the process the state follows to identify and pursue all potentially responsible parties that may be legally liable for plugging, remediating, or restoring orphaned wells in the state. [FGG Section IV.C.v.(a).6.]*
- *the means by which the information regarding the activities of the State under this grant will be made available on a public website. [FGG Section IV.C.v.(a).5]*
- *How the State will use funding to locate currently undocumented orphaned wells. [FGG Section IV.C.v.(i)]*
- *Plans the State has to engage third parties in partnerships around well plugging and site remediation, or any existing similar partnerships the State currently belongs to. [FGG Section IV.C.v.(j)]*

The Railroad Commission of Texas (RRC) is seeking Formula Grant funding under Sec. 40601 of the Infrastructure Investment and Jobs Act to plug, remediate, and reclaim orphaned wells located on State-owned or privately owned land across Texas. The Commission is the state agency with primary regulatory jurisdiction over the oil and natural gas industry with environmental and safety responsibilities related to oil and gas production. Protecting the environment and preserving natural resources by regulating fossil fuel energy production, storage, and delivery is one of the agency's primary goals. Statute and rules cited in this document are provided as an attachment to this narrative.

U.S. Department of the Interior  
Financial Assistance

The Commission began its statewide well plugging program in 1984 seeking to alleviate water quality problems associated with oil and gas production. Texas Natural Resources Code §89.043 delineates the processes and conditions for the Railroad Commission to plug an orphaned or abandoned well. In Texas, an orphaned well is an inactive, non-compliant well that has been inactive for a minimum of 12 months and the responsible operator's Organizational Report (Railroad Commission Form P-5) has been delinquent for greater than 12 months. The Commission's plugging standards are found within 16 Texas Administrative Code §3.14. Upon completion of a plugging job, a Plugging Record (Railroad Commission Form W-3) is submitted; this form documents the plugging procedure as implemented. It is signed by the cementer, and by a representative of the Railroad Commission. In nearly every instance when an orphaned well is plugged under contract with the Railroad Commission, Commission staff are on site throughout the plugging process to witness the job.

Texas Natural Resources Code §89.085 authorizes the Commission to dispose of well-site equipment and any amount of hydrocarbons from an orphaned or abandoned well in a commercially reasonable manner. When salvage equipment is present, the Commission provides public notice of the equipment available for bid, including a description of the equipment and any materials. When such activity occurs at well sited plugged using federal funds, proceeds are segregated within the State's General Revenue Dedicated Oil and Gas Regulation and Cleanup fund, per the direction of the State's Comptroller of Public Accounts. Salvage income becomes additive to the grant and is incorporated periodically into the grant budget using the SF-424A.

Texas Natural Resources Code §89.044 authorizes Commission staff to enter private property for the purpose of plugging or replugging a well that has not been properly plugged. The Railroad Commission has no authority to grant access to private property to a federal agency. The Commission will coordinate access to federal land for those wells that will be plugged under cooperative agreements with federal land management agencies.

The Commission developed a public website during the implementation of the Initial Grant. The website is available here: <https://www.rrc.texas.gov/oil-and-gas/environmental-cleanup-programs/federally-funded-well-plugging/> and contains a list of wells to be plugged with Infrastructure Investment and Jobs Act funding, the well prioritization system, rules related to inactive and orphaned wells, as well as other information related to this effort. The Commission will continue to update this website and use its social media channels to promote new information as it is available.

With an existing inventory of approximately 8,000 documented orphaned wells in Texas, resources are most effectively directed towards the known orphaned well population at this time. The Commission has extensive knowledge of both the state's current well population of over 440,000 wells and its historical well populations. Since the Railroad Commission's orphaned well plugging program began more than 45,000 orphaned wells have been plugged by the Commission, with more than 230,000 additional wells plugged by operators in Texas since 1991. Undocumented orphaned wells are most likely to be identified by resources on the ground; landowners, recreational land users, oil and gas operators, or Railroad Commission field inspectors are among those most likely to identify individual, unknown orphaned wells.

Texas is a member of the Interstate Oil and Gas Compact Commission and the Ground Water Protection Council. The Commission is unlikely to engage in any third-party partnerships around well plugging and site remediation.

## Summary of Well Prioritization Process *[FGG Sections IV.C.v.(a).2, IV.C.v.(e) & IV.C.v.(h)]*

- *Describe how the State will prioritize (i.e., rank for remediation activity) orphaned wells based on threats to public health and safety, environmental harm – particularly harms due to methane emissions – and other land use priorities, including the remediation of hazardous sites in overburdened and underserved communities. [FGG Sections IV.C.v.(a).2.]*
- *Provide details of how the State will identify and prioritize the highest methane emitters and how the State will identify and prioritize well plugging and site reclamation that are intended to address disproportionate burdens of adverse human health or environmental impacts of orphaned wells on communities of color, low-income communities, and Tribal and indigenous communities. Consistent with Sec. 40601(c)(2)(A)(viii), States will identify and factor into their project prioritizations orphaned wells within 0.5 miles of communities of color, low-income communities, and Tribal and Indigenous communities. Identification of such communities will utilize established tools, such as CEJST. Decision points and underlying assumptions, such as the number and type of environmental indicators, must be described in the application. [FGG Sections IV.C.v.(e)]*

With experience plugging more than 45,000 orphaned wells since the well plugging program's inception, the Commission has a well-established prioritization process that assigns numerical values to factors in four categories: well completion, wellbore conditions, well location with respect to sensitive areas, and unique environmental, social, or economic concern. The sum of those values assigns a priority level to each well. A copy of the prioritization system is an attachment to this narrative.

With the implementation of the Initial Grant, the Commission incorporated more than 20 factors from the EPA's Environmental Justice screening tool and combined that information with population and demographic census data to assess community-based factors within 0.5 miles of each orphaned well in the state, which provides more granularity to prioritize wells selected for plugging with Infrastructure Act funds. The EPA screening tool provides a percentile for each variable to standardize variables across disparate categories. The Railroad Commission sums those percentiles to obtain a whole number that is then multiplied by the estimated population within a half mile of the well site. The resulting number is used in tandem with the Commission's existing prioritization system. As District Offices identify wells for plugging packages the existing prioritization system is supplemented with the Environmental Justice screening number. All other factors being equal, a well with a higher Environmental Justice screening number is likely to be plugged with Infrastructure Funds before a well with a lower Environmental Justice screening number. With the implementation of the Formula Grant, the Commission will transition to use data from the Council on Environmental Quality's Climate and Environmental Justice screening tool.

During state fiscal year 2023, the Commission implemented an on-going fugitive emissions project to assess the scope of fugitive emissions from orphaned wells. In preparation for implementation of Formula Grant funds, the Commission focused its fiscal year 2023 inspections on the state's orphaned well population. In addition to the Commission's standard inspection elements, during most orphaned well sites inspections, Commission staff use FLIR GF320 cameras to screen for leaking gas at the site. Screening data is compiled, cross-referenced, and shared with District Offices to prioritize plugging those wells with fugitive emissions. With state appropriated funds, the Commission will purchase equipment to enhance its existing FLIR cameras with technology that can quantify fugitive emissions. The FLIR QL320 Quantitative OGI tablet is capable of measuring methane emissions in grams per hour (g/h) to the level of a single gram per hour. The Commission seeks to purchase an additional 10 cameras with Phase I Formula Grant funds.

## Public Outreach for Well Prioritization:

*Methods the State will use to solicit recommendations from local officials and the public regarding the prioritization of well plugging and site remediation activities, and any other processes the State will use to solicit feedback on the program from local governments and the public.*

*[FGG Sections IV.C.v.(h)]*

The Railroad Commission will engage with local officials using the resources of the Texas Association of Counties and the Texas Municipal League to broadly distribute information about the Commission's well plugging activities. The Commission has a dedicated email address for federally funded well plugging efforts, which the public may use to make recommendations on the criteria used by the Commission to prioritize wells for plugging, or any other related matter. The criteria is available on the Commission's website, and the opportunity to make recommendations will be announced using distribution lists, emails to associations and legislative entities, posts on social media, and announcements on the Commission's website. There will be ongoing state legislative oversight of the agency and its implementation of the well plugging program from the Texas House Committee on Environmental Regulation, the Texas House Committee on Energy Resources Committee, and the Texas Senate Committee on Natural Resources and Economic Development.

## Pre-and Post-Plugging Measurement of Emissions of Methane and Other Gasses

*[FGG Section V.A]*

*Describe how the state will perform pre- and post-plugging inspections of wells and measurement of emissions of methane and other gases, including whether the work will be performed by state personnel or contractors, training of personnel to perform the measurements, the technical methodology to be used, and how the methodology meets the minimum standard of the DOI methane measurement guidelines.*

*[FGG Section V.A.]*

The Railroad Commission used the project period of the Initial Grant to assess the scope of fugitive emissions from orphaned wells, and to determine the most effective and cost-efficient methodology to measure and track those fugitive gas emissions associated with orphaned wells. The Commission relies on its established Well Plugging Priority System to develop well plugging work orders. During approximately 2,500 inspections the Commission augmented its orphaned well inspection process to include the use of infrared cameras—FLIR GF 320 and GR77 models—to obtain a binary detect or no detect methane assessment. Data from this effort indicates that approximately 90 percent of wells assessed did not have a measurable release of fugitive gas emissions at the time of assessment. The Commission will continue to deploy an initial binary detect or no detect assessment for wells to be plugged with Formula Grant funds. If no emissions are witnessed no other measurements will be done. If the binary determination identifies the presence of methane emissions, the FLIR QL320 Quantitative OGI tablet is capable of measuring methane emissions in grams per hour (g/h) to the level of a single gram per hour. A second measurement will be taken within 60 days of plugging to determine the subsequent absence of methane emissions. A representative from the vendor will train Commission staff to appropriately use these tools to assess and quantify fugitive emissions.

Railroad Commission Field Inspectors will perform the binary assessment during orphaned well inspections, and, if necessary, within 60 days of the conclusion of plugging activities.

Site Remediation & Restoration *[FGG Sections IV.C.v.(f), IV.C.v.(g), V.B.iii & V.B.iv]*

- *Describe the state's program for conducting remediation of contaminants in soil, water, or other medium resulting from orphaned well and the process and describe applicable state or federal laws or regulations that are applicable. [FGG Section V.B.iv.]*
- *Describe the methodology, including field indicators, sampling, and modeling approaches, to be used by the State to measure and track contamination of groundwater and surface water associated with orphaned wells, including how the State will assess the effectiveness of plugging activities in reducing or eliminating such contamination. [FGG Section IV.C.v.(f)]*
- *Describe methods to be used to decommission or remove associated pipelines, facilities, and infrastructure and to remediate soil and restore habitat that has been degraded due to the presence of orphaned wells and associated infrastructure, including a description of how salvaged material and equipment will be reused, recycled, or sold for scrap (with any resulting income reported to DOI). [FGG Section IV.C.v.(g)]*
- *Describe a plan to monitor the reclaimed locations to ensure remediation and reclamation success. Such plan should include methodology and chronology of monitoring, data collection, and a plan for additional reclamation should the initial attempt be unsuccessful. The activities outlined in the plan should be incorporated into the preliminary work schedule and description of milestones in the work plan as well. [FGG Section IV.C.v.(n)]*  
*[FGG Section IV.C.v.(n)]*
- *Describe state standards for well abandonment, including actions necessary to complete surface reclamation and revegetation. If the state does not have well abandonment standards, describe how the state will meet the Bureau of Land Management Reclamation and Abandonment Standards for well sites where appropriate.*  
*[see [Chapter 6 - Reclamation and Abandonment.pdf \(blm.gov\)](#)] [FGG Section V.B.iii.]*

The Railroad Commission's site remediation program functions in conjunction with, but separately, from its well plugging program. The site remediation program has a prioritization system much like the well plugging priority system, with abandoned oilfield sites prioritized based on the present or possible future impact to the environment and public safety, inclusive of factors related to public health, safety, and the protection of the environment. An abandoned site becomes a candidate for the Commission's site remediation program when the responsible party fails or refuses to act, or is unknown, deceased, or bankrupt.

Generally, the Commission anticipates that its existing methodology related to contamination of groundwater and surface water will be followed with Formula Grant funds as well. During pre-plugging well inspections, the Commission will assess any evidence of corrosion or casing leaks, evidence of spills or leaks from surface equipment, and evidence of vertical migration of contamination from soil excavations. Data is collected and reviewed by staff. Based on the severity of any identified concerns as well as other site-specific factors such as proximity to surface water bodies, depth to groundwater, the presence or absence of permeable soils susceptible to vertical migration of contamination; the Commission may take further steps to investigate for possible contamination of surface water or groundwater. Where groundwater contamination is reasonably suspected, the Commission will deploy a professional engineering firm to install soil borings and monitor wells to characterize and, if appropriate, remediate and monitor groundwater contamination. Under existing procedures, the Commission generally does not measure or track contamination of groundwater and surface water unless site specific conditions warrant such activities.

Should an orphaned well site have conditions indicative of groundwater contamination, the Commission will engage with an environmental engineering firm to install groundwater monitoring wells to delineate and monitor any groundwater contamination. Initial groundwater monitoring data will determine an appropriate cleanup or control-based remedy based on groundwater use at the site and surrounding properties. If evidence of past spills to ground surface is observed, a limited subsurface assessment may be performed using backhoe, hand shovel, or hand auger to determine the extent of vertical penetration of contamination. If vertical penetration of contamination is not observed, further investigation is unlikely. Should indicators of actual or likely groundwater contamination be identified, Commission staff or a contracted qualified environmental engineering firm will perform a desk-top evaluation of area groundwater resources and inventory water wells within a quarter mile radius of the well site. Information gathered through this process will be used to design a subsurface investigation to assess the condition of soils and shallow groundwater. If groundwater contamination is confirmed, licensed water well drillers will install permanent monitor wells, with a sampling plan to assess the extent of contamination and to establish trends in concentration following the plugging and surface remediation activity.

Specific post-remediation confirmation and monitoring plans are developed on a per site basis, with groundwater monitoring findings reported to the Commission on a monthly or quarterly basis, based on specific site needs. Such monitoring is developed and implemented by a qualified engineering firm to properly sample and gauge groundwater monitoring wells and prepare professionally-sealed reports that describe the scope of cleanup activities, and their success or failure in eliminating sources of groundwater contamination. Additional remedial measures will be designed and implemented if necessary.

The Commission anticipates that its existing methodology for site remediation will be followed with Formula Grant funds. Contractors working under the Commission's oversight perform routine tank battery cleanup activities, which include assessing sites to determine priority, types and volumes of wastes, inspecting surface equipment for evidence of spills and leaks, loading, hauling and disposing of waste, removing or remediating contaminated soils, purging, cutting, and either removing or capping flowlines and gathering lines, and rendering abandoned equipment useless. Abandoned equipment may be removed as well, typically when the equipment has salvage or scrap value or for safety reasons. Texas Natural Resources Code §89.085 authorizes the Commission to dispose of well-site equipment and any amount of hydrocarbons from an orphaned or abandoned well in a commercially reasonable manner. When salvage equipment is present, the Commission provides public notice of the equipment available for bid, including a description of the equipment and any materials.

Following cleanup, contractors may restore the land surface to original grade and revegetate with native grasses to prevent erosion and protect surface water from sediment runoff.

The Commission's plugging standards are found within 16 Texas Administrative Code §3.14. The Commission's standards for cleanup of soil contaminated by a crude oil spill are found within 16 Texas Administrative Code §3.91, while water protection standards may be found in 16 Texas Administrative Code §3.8.

#### Workforce Development & Related Activities *[FGG Sections IV.C.v.(k), IV.C.v.(l), & V.C]*

- *Describe any plans the State has to support opportunities for all workers and vendors, including workers underrepresented in well plugging or site remediation, workers in traditional energy communities impacted by changing markets and technology, and workers from underserved communities to be trained and placed in good-paying jobs directly related to the project, including*

*through workforce development programs and incorporating workforce strategies into project development. [FGG Section IV.C.v.(k)]*

- *Provide a description of [FGG Section IV.C.v.(l)]:*
  1. *Training programs, including pre-apprenticeships, registered apprenticeships, local and economic hire agreements for workers, and engagement with relevant labor unions with which the State intends to conduct outreach, partner, or fund in well plugging or site remediation;*
  2. *Plans the State may or may not have to use procurement processes that incentivize contractors to hire current or former employees of the oil and gas industry;*
  3. *Whether the State plans to bundle and aggregate projects into larger state-wide or regional contracts as part of their procurement processes;*
  4. *Whether the State plans to support safe, equitable, and fair labor practices by adopting, requiring, or encouraging contractors to adopt collective bargaining agreements, local hiring provisions, project labor agreements, and community benefits agreements; and*
  5. *Whether, and if so, how, the State plans to use a program to help determine if a contractor is “responsible,” such as a responsible contractor ordinance, pre-qualification requirements or similar programs.*
- *Indicate If you intend to implement any of the recommended Workforce Standards described in Section V.C. of the Formula Grant Guidance, and if so, describe how you will do so.*

Workforce development programs in Texas are administered by the Texas Workforce Commission, which provides direct training and workforce development services through Local Workforce Development Boards across Texas. Workforce Development Boards often work with local community colleges to provide targeted training opportunities for in-demand industries. Several community colleges across the Texas offer International Association of Drilling Contractors programs to provide the oil and gas industry with screened, rig-ready new hire candidates. These programs provide classroom and lab training for entry-level workers giving them the knowledge and skills needed for employment in the drilling and exploration sector of the oil and gas industry, which are also necessary for well plugging and site remediation work. Community colleges across Texas are adept at quickly developing continuing education certification programs to meet regional job training needs in conjunction with 28 Local Workforce Development Boards across the state, using funding available to them from sources dedicated to workforce strategies. The Railroad Commission does not have statutory authority related to workforce strategies, nor does Section 40601 of the Infrastructure Act allow for workforce development activities as an allowable cost.

With an existing structure for training programs at community colleges across Texas, the Railroad Commission will continue to support efforts begun in 2018 when the Texas Energy Education and Workforce Development Initiative brought together members of industry, academia, and government to ensure that Texas prepares the workforce of tomorrow that will power the energy sector. Representatives from the Texas Legislature, Texas Workforce Commission, Texas Education Agency, Texas Higher Education Coordinating Board, Texas Association of Community Colleges, Texas Oil and Gas Association, Texas Alliance of Energy Producers, Texas Independent Producers and Royalty Owners Association, Permian Basin Petroleum Association, Texas Pipeline Association, Texas Natural Gas Foundation, and several oil and gas companies engaged with the Commission to identify energy sector workforce development needs for the state, including those related to well plugging and site remediation.

The Commission's practices proactively ensure equal opportunity for contracting. Chapter 2161, Texas Government Code established the State's Historically Underutilized Business (HUB) Program, which

U.S. Department of the Interior  
Financial Assistance

mandates the Commission promote fair and equal business opportunities for all qualified respondents. On July 14, 2023, the Commission posted a notice of intent to issue a solicitation for well plugging and related services to be funded by the Commission's state appropriation as well as any federal funds resulting from this application. The solicitation itself will not be posted until mid-September allowing time for outreach to increase public awareness of the contracting opportunities. As with all Commission solicitations, this solicitation will require respondents to identify applicable subcontracting opportunities for HUB vendors and submit a HUB Subcontracting Plan.

The Railroad Commission must comply with all state purchasing statutes, primarily codified by Title 10, Subtitle D of the Texas Government Code as well as Chapters 2261 and 2262 of the Texas Government Code. To the extent that it is allowable under state law, the Commission will request that any contractors report any data they may collect about their employment of current or former employees of the oil and gas industry on Infrastructure Act funded contracts. The Commission evaluates responses to a Request for Qualifications (RFQ) in accordance with criteria established in solicitation documents and does not play a direct role in the personnel decisions of contractors, though the ability to maintain an experienced plugging rig crew is critical to meet the requirements of well plugging and site remediation RFQs.

Railroad Commission operations for plugging and site remediation are divided geographically into twelve districts and ten regional field offices. An RFQ solicitation requires respondents to identify those districts where they are prepared to perform required activities. Texas is geographically vast and site mobilization and demobilization costs increase with distance from the yard where a plugging rig is based. While the Commission accounts for geographic considerations in the contracting award process, projects are not bundled or aggregated at this phase of the contracting process. After a respondent is deemed "qualified" through the RFQ process, the Commission develops work orders that group together multiple wells with geographic proximity, or other similarities that would support such a grouping.

The State of Texas abides by the Fair Labor Standards Act, Equal Employment Opportunity laws, and all other federal and state labor laws. The Railroad Commission as solicitor of services would not inhibit any collective bargaining agreements that exist between a contractor and their employees; however, the Commission has limited authority to regulate labor relations. Pursuant to Texas Labor Code §101.052, no person may be denied employment on account of membership or non-membership in a labor union. The Commission does not have statutory authority to mandate local hiring, project labor agreements, or community benefits agreements in its contracts.

To plug oil and gas wells in the state of Texas, a well plugging contractor must be approved by the Railroad Commission in accordance with 16 Texas Administrative Code §3.14. Approved cementers must have an active Organizational Report (Railroad Commission Form P-5) on file, with appropriate financial assurance record with the Commission in accordance with Texas Natural Resources Code §91.142. A well plugging contractor must also demonstrate their well plugging qualifications by plugging a well as a Railroad Commission inspector witnesses the operation and evaluates the quality of work to determine whether the prospective cementer can meet Commission standards. Each month, the Railroad Commission updates its list approved of cementers on its website.

Site remediation contractors must meet the minimum qualifications set forth in each solicitation for remediation work, which may include applicable licenses or certifications. In response to a solicitation for site remediation services, respondents must include examples and detailed description of at least three projects completed within the past five years that demonstrate their ability and qualifications to complete similar projects. Respondent should describe projects that demonstrate their ability to meet or exceed the minimum qualifications and experience required by the solicitation. For more complex site remediation

projects, the Commission may require, at its discretion, an environmental services contractor to obtain appropriate bonding prior to a project's start.

For all projects or aggregated projects, including those exceeding \$1 million, the Commission will require contractors to comply with workforce standards consistent with applicable Federal and State laws.

#### Federal and Tribal Coordination *[FGG Section IV.C.v.(m)]*

*Describe procedures the State will use to coordinate with Federal or Tribal agencies to determine whether efficiencies may exist by combining field survey, plugging, or surface remediation work across private, State, Federal, and Tribal land. [FGG Section IV.C.v.(m)]*

The Commission has a cooperative agreement with the National Park Service to address sites within the Big Thicket National Preserve. The Commission also has a cooperative agreement with the U.S. Forest Service to address sites within the Angelina National Forest and the Sabine National Forest. U.S. Fish and Wildlife contacted the Commission about orphaned wells located on lands they manage, but U.S. Fish and Wildlife does not have funds for plugging wells in Texas at this time. Should those wells, or any other wells on federal lands, be selected for plugging under the federal program established by section 40601, the federal land manager should work with the Commission to establish a cooperative agreement with funding for the Commission to plug those wells. In Texas, an orphaned well must be plugged by the Railroad Commission pursuant to 16 Texas Administrative Code §3.14.

#### Work Plan Activities, Milestones & Schedule *[FGG Sections IV.C.v.(a).3 & IV.C.v.(a) 4]*

##### Task/Activity Description

- *Provide a description of the details of each activity to be carried out with the grant, including a preliminary work schedule covering the period of performance of the Formula grant. Each activity must include a schedule and resources needed for getting the work completed, which must cover the entire project period;*  
*[FGG Section IV.C.v.(a)3.]*
- *Describe what tasks will be performed by partner organizations, sub-awards, contractors, and consultants, if applicable. [FGG Section IV.C.v.(a)3.]*
- *Describe any process and/or information that will be used to support environmental compliance review requirements.*
- *Identify proposed performance goals including a schedule of milestones for completing the activities described above and to achieve the objectives of the workplan, in a table (a suggested example is shown below), or through other graphical aids, project schedule, Gantt chart, etc. [FGG Section IV.C.v.(a)4.]*

Activity	Preliminary Schedule	Resources
Amend Existing Well Plugging and Site Remediation Contracts	August 2023-September 2023	Pre-Award, RRC Contracts Management and Program Staff
Release Solicitation for New Well Plugging and Site Remediation Contracts	September 2023	Pre-Award, RRC Contracts Management and Program Staff
Formula Grant Phase I Awarded	Anticipate December 2023	DOI Program and Grants Management Staff
Deploy well plugging contractors under amended contracts to plug wells, with RRC staff in an oversight role	December 2023-February 2024	Grant funded RRC Well Plugging staff, and existing contractors
Award new Well Plugging and Site Remediation Contracts	March 2024	RRC Contracts Management and Program Staff
Deploy newly contracted resources to plug wells along with RRC staff in an oversight role	March 2024-November 2026	Grant funded RRC Well Plugging staff, and existing contractors
Submit Quarterly Reports	October, January, April, and July for each year of the project period.	RRC Project Management, Financial and Grants Management Staff
Submit Closeout Reports	March 2027	RRC Project Management, Financial and Grants Management Staff

Estimate of Program Outcomes: [\[FGG Sections IV.C.v.\(a\).3 & IV.C.v.\(b\)\]](#)

- *Public Benefit and Program Interest: Identify the estimated health, safety, habitat, and environmental benefits of plugging, remediating, or reclaiming orphaned wells. [\[FGG Sections IV.C.v.\(a\).3.\]](#)*
- *Provide an estimate that the Department acknowledges is a snapshot in time and subject to change as circumstances on the ground dictate, of [\[FGG Sections IV.C.v.\(b\)\]](#):*
  1. *the number of orphaned wells or sites, categorized by the region in the State that the State forecasts may be plugged, remediated, or reclaimed using Phase 1 formula grant funds;*
  2. *the projected cost, including the basis of estimates, of—*
    - Plugging, remediating, or reclaiming orphaned wells;*
    - remediating or reclaiming adjacent land; and*
    - Decommissioning or removing associated pipelines, facilities, and infrastructure;*
  3. *the amount of that projected cost that will be offset by the forfeiture of financial assurance instruments, the estimated salvage of well site equipment, or other proceeds from the orphaned wells and adjacent land;*
  4. *the number of jobs that will be created or saved through the activities to be funded under this grant and the assumptions and methodology to develop the estimate; and*

*5. to the extent possible, the miles and diameter(s) of associated pipelines and number and description of associated facilities and infrastructure assets that will be decommissioned or removed.*

The Railroad Commission's implementation of Phase I of the Formula Grant authorized by Section 40601 of the Infrastructure Investment and Jobs Act (2021) will benefit the public by eliminating the potential threat of an uncontrolled liquid hydrocarbon release from orphaned wells across Texas. Mitigation efforts will implement proper well plugging techniques to protect subsurface and surface waters, wetlands, protected species, and sensitive natural resources, as well as the removal of above and below ground oil and gas well equipment. The program interest will be served as contracted well plugging service companies complete generally accepted and state regulator approved well plugging procedures, with Commission staff onsite to oversee operations and document the plugging of each well, ensuring that plugging operations comply with all regulatory requirements.

With Formula Grant Phase I funding, the Commission anticipates it will oversee plugging of 1,850 inland oil and gas wells. The Commission divides the state of Texas into twelve districts, each assigned to one of ten district offices within three regions, as shown in the map included in the Appendices to this application. With a goal of plugging 1,850 wells during Phase I, the Commission will allocate funds across its 12 districts, with some districts receiving more funding than others to address factors such as a high concentration of hydrogen sulfide (H<sub>2</sub>S) wells, community-based factors, and the cost differentials that occur across a state as large as Texas. The Commission does not anticipate it will plug any wells in the Wichita Falls District, just as with the Initial Grant. Plugging contractors based in the Wichita Falls area expressed concern with federal requirements, particularly the requirements of the Davis-Bacon Act. In planning for Phase I, no funds are allocated to this district. Should a plugging contractor in this area respond to the RFQ, the Commission will revise its estimates and workplan at that time.

<b>District - (District Office)</b>	<b>Wells Plugged</b>	<b>District Description</b>
1 - San Antonio	378	Central Texas includes Austin and San Antonio
2 - San Antonio	106	Costal Central Texas includes Victoria
3 - Houston	134	Southeast Texas includes Houston and Beaumont
4 - Corpus Christi	79	South Texas includes Corpus Christi and Brownsville
5 - Kilgore	54	Northeast Central Texas includes Dallas, Fort Worth, and Waco
6 - Kilgore	189	Northeast Texas includes Tyler, Longview, and Texarkana
7B - Abilene	358	North Central Texas includes Abilene
7C - San Angelo	60	West Central Texas includes San Angelo
8 - Midland	227	West Texas includes Midland and El Paso
8A - Lubbock	40	Lower Panhandle includes Lubbock
9 - Wichita Falls	0	North Texas includes Wichita Falls
10 - Pampa	225	North Panhandle includes Pampa
<b>Total</b>	<b>1,850</b>	

The Commission anticipates that from its Phase I allocation, \$69.7 million will be allocated to well plugging and \$2 million will be used for site remediation efforts at well sites that were plugged with funding from the Infrastructure Act Initial Grant, along with Phase I Formula Grant well sites totaling approximately 100 well sites. Preliminary analysis is underway to identify those sites that require

U.S. Department of the Interior  
Financial Assistance

remediation, which typically could include removal of hydrocarbon waste, clean out and render tanks useless, and removal or remediation of any soil contaminated by spillage.

The Commission does not anticipate that it will decommission or remove pipelines, facilities, or other infrastructure and cannot estimate associated costs at this time.

The Commission is unable to estimate the projected costs that may be offset by the forfeiture of financial assurance instruments, the estimated salvage of well site equipment, or other proceeds from the orphaned wells and adjacent land as each orphaned well site offers a unique circumstance that may not be predicted in advance of plugging operations. During the Initial Grant, the Commission collected more than \$1.2 million in salvage revenue from \$23.6 million of contracted well pluggings; however, this number is an example rather than an indicator of future collections. The Commission has several additional tools available to offset costs in addition to salvage equipment.

Chapter 91 of the Texas Natural Resources Code requires operators file a bond, letter of credit, or cash deposit providing financial assurance to operate in the state. This financial assurance is forfeited if the operator becomes delinquent in their reporting requirements. Natural Resources Code Sec. 91.108 requires these funds to be *used only for actual well plugging and surface remediation*. Financial security forfeitures are included in the Commission's annual state-funded well plugging and site remediation budgets. Financial security forfeitures are used to plug orphaned wells as part of the on-going state-funded effort to address orphaned wells but will not directly offset any Phase I Formula Grant well plugging projected costs. Financial security forfeitures are collected when an operator is no longer compliant with Commission rules. Forfeiture funds are used in the year they are received to plug wells according to the Commission's prioritization system. A well for which an operator forfeited their financial security may not be plugged for several years or could be taken over by another operator.

The Commission works with the Texas Office of the Attorney General (OAG) to seek reimbursement for plugging costs from the operator of record when the Commission must plug a well. The success rate of these reimbursement collections is low as most of these operators are no longer in business. Some reimbursements are collected by OAG in installments over a period of several years to avoid being a financial hardship for an operator. The sporadic nature of collections prevents the Commission from estimating a reimbursement recovery rate for well pluggings from Phase I. It is likely that any collections would not be received until after Phase I is complete. Any reimbursements received for wells plugged with Infrastructure Act funds will be treated as program income. The Commission will request to use these funds as additive to its Formula Grant allocation in a manner similar to its requests stemming from salvage equipment revenue.

RRC intends to fund 56.5 full-time equivalent positions (FTEs) with Phase I Formula Grant funds, as noted in the budget narrative.

As of August 31, 2023, with Initial Grant funds Commissions contractors (and their subcontractors) reported 120,226 hours for 366 unique employees in Certified Payrolls for Davis-Bacon Act compliance. Davis-Bacon covered employees do not represent that totality of contractor positions funded with the Initial Grant. Further, employees are typically paid for travel time to the worksites which is not recorded as Davis-Bacon covered time as the employee is not on the job site. Generally, supervisors do not report hours unless they work a significant portion of their time on heavy equipment which varies contractor to contract. The Formula Grant will fund nearly three time as many well pluggings, along with site remediation work, but the Commission is unable to provide an estimate with a replicable and reliable methodology, as this is better determined by subject matter experts with additional data sources.

U.S. Department of the Interior  
Financial Assistance

The Commission does not anticipate that it will decommission or remove pipelines, facilities, or other infrastructure with Phase I Formula Grant funds, and cannot identify the miles and diameter of associated pipelines or provide the number and description of any associated facilities or infrastructure assets that may be decommissioned or removed, but site-specific circumstances will be addressed as appropriate.

Identification of Wells to be Plugged, Remediated, or Reclaimed [\[FGG Section IV.C.\(c\)\]](#)

*If practical, identify the latitude/longitude, type of well, the well ID (API number), surface ownership, and mineral ownership for those wells that are likely to be plugged, remediated, or reclaimed. [\[FGG Section IV.C.\(c\)\]](#)*

The Commission will determine the specific wells that will be plugged with Formula Grant funds as funding is implemented through its standard work order process. As an attachment to this application, the Commission included the August 2023 list of Orphaned Wells with a P-5 delinquent for more than twelve months. The list is updated monthly, and may be found on the Commission's website.<sup>1</sup> The list includes the lease name, operator name, and API number, as well as the number of months each well has been inactive. Also found on the Commission's website is a list of wells identified through the work order process for plugging with Infrastructure Act funds.<sup>2</sup> This list contains latitude and longitude coordinates. The Commission does not maintain surface ownership or mineral ownership data.

Timeline or Milestones to Complete Expected Results:

*Describe significant outputs and expected results or outcomes of the project with a clear set of milestones and how they will be measured within a specified timeframe. All proposals must have measurable results that correlate to a timeline.*

Milestone / Task / Activity	Start Date	Completion Date
Amend 8 existing Well Plugging and Site Remediation Contracts (Pre-award activity)	8/15/2023	9/15/2023
Award Well Plugging and Site Remediation Contracts (Pre-award activity). Activities include all associated solicitation development tasks, review of responses and awarding of contracts. The Commission is uncertain what the response will be or how many contracts it anticipates issuing.	9/1/2023	3/1/2024

---

<sup>1</sup> Please see: <https://www.rrc.texas.gov/oil-and-gas/research-and-statistics/well-information/orphan-wells-12-months/>

<sup>2</sup> Please see "Wells to be Plugged with IIJA Funds" (excel) found here: <https://www.rrc.texas.gov/oil-and-gas/environmental-cleanup-programs/federally-funded-well-plugging/>

U.S. Department of the Interior  
Financial Assistance

Milestone / Task / Activity	Start Date	Completion Date
Transition staff from state funding to Formula Grant funding. With the conclusion of the administrative portion of the Initial Grant, staff hired specifically for the Initial Grant were funded with state funds to avoid disrupting the start of the Formula Grant. Upon award of the Formula Grant staff will immediately recommence their working overseeing federally funded well pluggings under amended, existing contracts.	12/1/2023	2/28/2024
Hire additional RRC Staff. Upon award of the Formula Grant, the Commission will begin the hiring process for new FTEs included in the Formula Grant Budget. The Commission anticipates staff will be in place no later than 3/1 to coincide with the awarding of new contracts. Once staff funded by the Initial Grant, and those new positions funded by the Formula Grant are in place, the Commission anticipates a total of 56.5 FTEs.	12/1/2023	2/28/2024
Evaluate well sites plugged with Initial Grant funds to determine what, if any, remediation is necessary at these sites. During the first three months of the Formula Grant, Site Remediation staff will review well plugging documentation to identify those well sites of approximately 700 wells plugged with Initial Grant funds are in need of additional site remediation work.	12/1/2023	2/28/2024
Review binary methane screening data to determine which orphaned well sites, if any, will require additional data collection to quantify methane emissions at specific orphaned well sites. This activity will be ongoing throughout the Formula Grant period, but in the first three months, staff will review screening data collected during the period of the Initial Grant, but funded with state appropriated dollars.	12/1/2023	2/28/2024
Update public website with data on wells plugged, wells to be plugged and their prioritization, along with any other relevant Formula Grant programmatic information. While this activity will be ongoing throughout the Formula Grant period in the first month following award the existing public website will see more frequent updates	12/1/2023	12/31/2023

U.S. Department of the Interior  
Financial Assistance

Milestone / Task / Activity	Start Date	Completion Date
Well plugging activities under existing contracts. Immediately upon award, the Commission will recommence plugging orphaned wells with federal funds. The Commission anticipates plugging 240 wells in the period between 12/1 and 2/28 under amended, existing contracts.	12/1/2023	2/28/2024
Well plugging activities under contracts issued in March 2024. The Commission anticipates plugging 1,610 wells in the period between 3/1/24 and 11/30/26 under contracts awarded in March 2024. While the Commission fully anticipates Phase I Formula Grant funds will be expended prior to November 2026, unforeseen circumstances create the potential for longer than anticipated plugging jobs. The Commission anticipates that Phase I will run concurrently with Phase II and potentially with Phase III as the grant process evolves.	3/1/2024	11/30/2026
Site Remediation activities under contracts issued in March 2024. The Commission anticipates site remediation cleanup activities will be conducted at 100 sites, where orphaned wells were previously plugged using either Initial or Formula Grant funds. While the Commission fully anticipates Phase I Formula Grant funds will be expended prior to November 2026, unforeseen circumstances create the potential for longer than anticipated site remediation work or ongoing monitoring needs. The Commission anticipates that Phase I will run concurrently with Phase II and potentially with Phase III as the grant process evolves.	3/1/2024	11/30/2026
Submit Quarterly Reports. In compliance with grant agreement documents, the Commission will submit all required documents by the agreed upon dates. Dates listed in this document assume a federal quarterly schedule.	End of October, January, April, and July for each year of the project period.	
Submit Closeout Reports. In compliance with grant agreement documents, the Commission will submit all required closeout documents by the agreed upon date. Date listed in this document assumes 120 days after the conclusion of the project period.	12/1/2026	3/31/2027

## PROJECT MONITORING AND EVALUATION PLAN:

*Describe how you will measure project performance and assessment tools to be used and how you will evaluate the performance of sub awards, subrecipients, contractors etc.*

The Commission relies on several performance metrics to assess the success of its programs, and will use those same metrics to assess performance related specifically to Phase I Formula Grant funded well plugging and site remediation efforts.

On a state fiscal year annual basis, the Commission will identify:

1. Percentage of identified abandoned pollution sites investigated, assessed, or cleaned up with Phase I Formal Grant funds
2. Percentage of known orphaned wells plugged with Phase I Formal Grant funds
3. Number of identified abandoned pollution sites that are candidates for Phase I Formal Grant funds cleanup
4. Number of known orphaned wells

On a state fiscal year quarterly basis, the Commission will identify:

1. Number of abandoned pollution sites investigated, assessed, or cleaned up with Phase I Formal Grant funds
2. Number of orphaned wells plugged with Phase I Formal Grant funds
3. Total aggregate plugging depth of orphaned wells plugged with Phase I Formal Grant funds
4. Average number of days to complete abandoned Phase I Formal Grant funded site clean-up
5. Average number of days to plug an orphaned well with Phase I Formal Grant funds

The Commission evaluates its contractors based on their adherence to legislative and regulatory standards, as well as any site-specific contract-based standards. These standards are detailed for contractors in solicitation documents, generally in Attachment 1: Statement of Services. All work conducted for the Commission must be performed in accordance with applicable federal, state, and local statutes, laws, ordinances, regulations, and rules, including Railroad Commission Statewide Rules, codified in Texas Administrative Code, Title 3, Chapter 16, the specifications within the associated Statement of Services and any Work Order issued under the Contract, as well as all terms and conditions of the contract. Each contract includes clauses that allow for termination for cause or termination for convenience.

The Commission does not anticipate any subawards or subrecipients will be used in its implementation of Phase I Formula Grants.

## QUALIFICATIONS:

- *List key project personnel and responsibilities (e.g., Principal Investigator/Program Director and Administrative Official/Authorized Representative) and describe their experience and qualifications that are appropriate to the success of the project/program.*
- *List contractors, sub-awards, and consultants, if known, and their qualifications.*

U.S. Department of the Interior  
Financial Assistance

Clay Woodul, Mr. Woodul has 39 years of experience with the Railroad Commission. Since 2018, he has served as the Assistant Director of the Oil and Gas Division for the Field Operations Section. Mr. Woodul began his career as a field inspector, working from the San Angelo District Office. In the field, Mr. Woodul conducted inspections to ensure operator compliance with Railroad Commission rules and regulations; he also witnessed plugging operations conducted by the Commission's newly formed Orphaned Well Plugging program. In 1995, Mr. Woodul transferred to Commission headquarters in Austin, and has since been directly involved in all aspects of the Commission's Well Plugging program building on the field experience he gained at the program's inception. In his role as Assistant Director, Mr. Woodul is responsible for the management of regulatory compliance and enforcement, along with management and operations of the State Managed Plugging program.

Peter Pope, Mr. Pope has 23 years of experience with the Railroad Commission working exclusively in the Site Remediation Section. Mr. Pope is a licensed professional geoscientist with extensive experience performing or providing oversight of environmental site investigations and cleanup activities. As the current Manager of the Site Remediation Section, Mr. Pope is responsible for management of four cleanup programs, including the State Managed Cleanup program.

Keith May, Mr. May has ten years of experience with the Railroad Commission. During that time, he has served multiple roles in Technical Permitting and Field Operations. Since 2018, he has been directly involved in the State Managed Plugging program. As the Project Manager for State Managed Plugging, he oversees the day-to-day operations, creates reports, and implements initiatives to ensure performance measures are achieved.

Corey Crawford, Mr. Crawford is the project manager responsible for the financial aspects of the Commission's federally funded well plugging program. His responsibilities include monitoring compliance with state, federal and grant requirements. Mr. Crawford is a Certified Public Accountant with 16 years of governmental accounting experience with the State of Texas. He has extensive experience with budgeting and financial reporting across Texas state government.

Colleen Forrest, Ms. Forrest has 16 years of experience with the Railroad Commission. During that time, she has managed the Commission's grants, including projects funded from the American Recovery and Reinvestment Act, the RESTORE Act, and most recently the Infrastructure Investment and Jobs Act. As the Director of Strategic Initiatives, she also oversees the Commission's strategic planning processes and performance measurement.

#### LEVERAGING OF RESOURCES (optional, if applicable)

*If the State has any plans to leverage funds or resources with other federal and/or non-federal sources of funds or resources to carry out the proposed project/program, please describe those plans.*

While the Railroad Commission has a state appropriation for well plugging and site remediation concurrent with the Formula Grant project period, the two funding sources have separate requirements and will not be comingled or leveraged in a manner that would impose federal requirements on state funds or the implementation of ongoing state-funded programs.

### Texas Natural Resources Code Section 89.043 Plugging by Commission.

(a) If the commission determines at a hearing under Section 89.041 of this code that a well has not been properly plugged or needs replugging, the commission, through its employees or through a person acting as agent for the commission, may plug or replug the well if:

(1) the well was properly plugged according to rules in effect at the time the well was abandoned or ceased to be operated; or

(2) neither the operator nor nonoperator properly plugged the well, and

(A) neither the operator nor nonoperator can be found; or

(B) neither the operator nor nonoperator has assets with which to properly plug the well.

(b) If a well is leaking salt water, oil, or gas or is likely to leak salt water, oil, or gas, and the leakage will cause or is likely to cause a serious threat of pollution or injury to the public health, the commission, through its employees or agents, may direct the operator to take remedial action or to plug the well or may plug or replug the well without holding a hearing under Section 89.041 of this code or giving notice under Subsection (c) of this section.

(c) Not later than the 30th day before the date the commission enters into a contract to plug a delinquent inactive well, the commission shall send a notice by certified mail to the operator of the well at the address last reported to the commission as required by Section 91.142 and commission rules. The notice shall direct the operator to plug the well and shall state that:

(1) the commission may plug the well and foreclose its statutory lien under Section 89.083 unless the operator requests a hearing not later than the 10th day after the date the operator receives the notice;

(2) if the commission forecloses its statutory lien under Section 89.083, all well-site equipment will be presumed to have been abandoned and the commission may dispose of the equipment and hydrocarbons from the well as provided by Section 89.085;

(3) if the commission plugs the well, the commission:

(A) by order may require the operator to reimburse the commission for the plugging costs; or

(B) may request the attorney general to file suit against the operator to recover those costs;

(4) the commission has a statutory lien on all well-site equipment under Section 89.083; and

(5) the lien described by Subdivision (4) is foreclosed by operation of law if the commission does not receive a valid and timely request for a hearing before the 15th day after the date the notice is mailed.

(d) The operator of a well made the subject of a prior commission final order directing that it be plugged is not entitled to a second hearing under this section.

(e) The commission shall file for record a copy of the notice in the office of the county clerk of the county in which the well is located. The notice filed with the county need not be acknowledged. The copy of the notice filed in the office of the county clerk must contain the section, block, survey, and abstract number, when available to the commission, of the land on which the well is located. The clerk shall record the notice in the real property records of the county. The commission shall not be charged a fee for the filing or recording of the notice. The commission shall furnish a copy of the notice to a holder of a lien on the well or a nonoperator on that person's request. For purposes of title insurance policies issued under authority of Title 11, Insurance Code, this notice is not a notice of enforcement or violation of law, ordinance, or governmental regulation unless the notice contains a legally sufficient description of the specific land on which the well is located.

(f) At the request of the commission, the attorney general may file suit to enforce an order issued by the commission under Subsection (c)(3)(A).

[Texas Natural Resources Code Section 89.044. Right to Enter on Land.](#)

(a) The commission or its employees or agents, the operator, or the nonoperator, on proper identification, may enter the land of another for the purpose of plugging or replugging a well that has not been properly plugged.

(b) A prospective operator who has been authorized under Section 89.047 to conduct a surface inspection of a well, on proper identification, may enter the land of another for the sole purpose of conducting the inspection.

[Texas Natural Resources Code Section 89.085. Possession and Sale of Equipment to Cover Plugging Costs.](#)

(a) When the commission forecloses its lien under Section 89.083 on a delinquent inactive well, well-site equipment and any amount of hydrocarbons from the well that is stored on the lease are presumed to have been abandoned and may be disposed of by the commission in a commercially reasonable manner by either or both of the following methods:

(1) entering into a plugging contract that provides that the person plugging or cleaning up pollution, or both, will take title to well-site equipment, hydrocarbons from the well that are stored on the lease, or hydrocarbons recovered during the plugging operation in exchange for a sum of money deducted as a credit from the contract price; or

(2) selling the well-site equipment, hydrocarbons from the well that are stored on the lease, or hydrocarbons recovered during the plugging operation at a public auction or a public or private sale.

(b) The commission shall assign separate costs to:

- (1) removing well-site equipment;
- (2) plugging the well; and
- (3) transporting, storing, and disposing of the well-site equipment.

(c) The commission shall dispose of well-site equipment or hydrocarbons under this section at a price or value that reflects the generally recognized market value of the equipment or hydrocarbons, with allowances for physical condition.

(d) The commission shall deposit money received from the sale of well-site equipment or hydrocarbons under this section to the credit of the oil and gas regulation and cleanup fund. The commission shall separately account for money and credit received for each well.

(e) A person who acquires well-site equipment or hydrocarbons under this section by sale or contract receives a clear title, free of all prior legal or equitable claims of whatever nature, whether perfected or inchoate.

(f) Not later than the 30th day after the date well-site equipment or hydrocarbons are disposed of under this section, the commission shall mail a notice by first class mail to the operator of the well at the address last reported to the commission as required by Section 91.142 of this code and commission rules and, on request, to any lienholder or nonoperator.

(g) The notice required by Subsection (f) of this section must include:

- (1) the lease name;
- (2) the well number;
- (3) the county in which the well is located;
- (4) the abstract number of the property on which the lease is situated;
- (5) the commission lease or gas well identification number or drilling permit number;
- (6) a list of the property disposed of under this section; and

(7) a statement that any person who has a legal or equitable ownership or security interest in the equipment or hydrocarbons that was in existence on the date the commission foreclosed its statutory lien may file a claim with the commission.

(h) Not later than the 180th day after the date the well-site equipment or hydrocarbons are disposed of under this section, the commission shall publish a notice that states:

(1) the lease name;

(2) the well number;

(3) the county in which the well is located;

(4) the commission lease or gas well identification number or drilling permit number; and

(5) that equipment or hydrocarbons if applicable from the well and lease were disposed of under this section and that any person who has a legal or equitable ownership or security interest in the equipment or hydrocarbons that was in existence on the date the commission foreclosed its statutory lien may file a claim with the commission.

(i) The commission shall publish the notice required under Subsection (h) of this section in a newspaper of general circulation in the county in which the lease is located. A single notice may contain the information required for more than one well and lease. A notice given under this section following the plugging of a well may be combined with a notice given under Section 91.115 of this code following the cleanup of a site or facility.

## [Texas Natural Resources Code Chapter 91, Sections 91.103 – 91.1091 Financial Assurance Requirements.](#)

Section 91.103. Persons Required to Execute Bond, Letter of Credit, or Cash Deposit.

Any person, including any firm, partnership, joint stock association, corporation, or other organization, required to file an organization report under Section 91.142 of this code shall execute and file with the commission a bond, letter of credit, or cash deposit.

## [Section 91.104. Bonds, Letters of Credit, Cash Deposits, and Well-Specific Plugging Insurance Policies.](#)

(a) The commission shall require a bond, letter of credit, or cash deposit to be filed with the commission as provided by Subsection (b).

(b) A person required to file a bond, letter of credit, or cash deposit under Section 91.103 who is an inactive operator or who operates one or more wells must, at the time of filing or renewing an organization report required by Section 91.142, file:

- (1) an individual bond as provided under Section 91.1041;
- (2) a blanket bond as provided under Section 91.1042; or
- (3) a letter of credit or cash deposit in the same amount as required for an individual bond under Section 91.1041 or a blanket bond under Section 91.1042.

(c) A person required to file a bond, letter of credit, or cash deposit under Section 91.103 who operates one or more wells is considered to have met that requirement for a well if the well bore is included in a well-specific plugging insurance policy that:

- (1) is approved by the Texas Department of Insurance;
- (2) names this state as the owner and contingent beneficiary of the policy;
- (3) names a primary beneficiary who agrees to plug the specified well bore;
- (4) is fully prepaid and cannot be canceled or surrendered;
- (5) provides that the policy continues in effect until the specified well bore has been plugged;
- (6) provides that benefits will be paid when, but not before, the specified well bore has been plugged in accordance with commission rules in effect at the time of plugging; and
- (7) provides benefits that equal the greatest of:
  - (A) an amount equal to \$2 for each foot of well depth, as determined in the manner specified by the commission, for the specified well;
  - (B) if the specified well is a bay well and regardless of whether the well is producing oil or gas, the amount required under commission rules for a bay well that is not producing oil or gas;
  - (C) if the specified well is an offshore well and regardless of whether the well is producing oil or gas, the amount required under commission rules for an offshore well that is not producing oil or gas; or
  - (D) the payment otherwise due under the policy for plugging the well bore.

Section 91.1041. Individual Bond.

- (a) A person required to file a bond, letter of credit, or cash deposit under Section 91.103 who operates one or more wells may file a bond in an amount equal to \$2 for each foot of well depth for each well.
- (b) Notwithstanding Subsection (a), the commission by rule shall set the amount of the bond for an operator of one or more bay or offshore wells at a reasonable amount that exceeds the amount provided by Subsection (a).
- (c) When calculating under Subsection (a) the amount of the bond a person who operates one or more wells is required to file, the commission shall exclude a well if the well bore is included in a well-specific plugging insurance policy described by Section 91.104(c).
- (d) If the inclusion of a bay or offshore well whose well bore is included in a well-specific plugging insurance policy described by Section 91.104(c) in the calculation under Subsection (b) of the amount of the bond an operator of one or more bay or offshore wells is required to file would result in an increase in the amount of the bond that would otherwise be required, the rules must provide for the exclusion of the well from the calculation.

Section 91.1042. Blanket Bond.

- (a) A person required to file a bond, letter of credit, or cash deposit under Section 91.103 may file a blanket bond to cover all wells for which a bond, letter of credit, or cash deposit is required as follows:
  - (1) a person who operates 10 or fewer wells shall file a \$25,000 blanket bond;
  - (2) a person who operates more than 10 but fewer than 100 wells shall file a \$50,000 blanket bond; and
  - (3) a person who operates 100 or more wells shall file a \$250,000 blanket bond.
- (b) Notwithstanding Subsection (a), the commission by rule shall set the amount of the bond for an operator of bay or offshore wells at a reasonable amount that exceeds the amount provided by Subsection (a)(1), (2), or (3), as applicable.
- (c) When calculating the number of an operator's wells for purposes of Subsection (a), the commission shall exclude a well if the well bore is included in a well-specific plugging insurance policy described by Section 91.104(c).
- (d) If the inclusion of a bay or offshore well whose well bore is included in a well-specific plugging insurance policy described by Section 91.104(c) in the calculation under Subsection (b) of the amount of the bond an operator of bay or offshore wells is required to file would result in an increase in the

amount of the bond that would otherwise be required, the rules must provide for the exclusion of the well from the calculation.

#### Section 91.105. Bond Conditions.

Each bond required by Section 91.103 shall be conditioned that the operator will plug and abandon all wells and control, abate, and clean up pollution associated with an operator's oil and gas activities covered under the bond in accordance with the law of the state and the permits, rules, and orders of the commission. This section does not apply to a well-specific plugging insurance policy described by Section 91.104(c).

#### Section 91.106. Execution of Bond.

Each bond shall be executed by a corporate surety authorized to do business in this state and shall be renewed and be continued in effect until the conditions have been met or release is authorized by the commission.

#### Section 91.107. New Bond, Letter of Credit, or Cash Deposit.

If an active or inactive well is transferred, sold, or assigned by its operator, the commission shall require the party acquiring the well to file a new bond, letter of credit, or cash deposit as provided by Section 91.104(b), and the financial security of the prior operator shall continue to be required and to remain in effect, and the commission may not approve the transfer of operatorship, until the new bond, letter of credit, or cash deposit is provided or the commission determines that the bond, letter of credit, or cash deposit previously submitted to the commission by the person acquiring the well complies with this subchapter. A transfer of a well from one entity to another entity under common ownership is a transfer for purposes of this section. This section does not apply to a well bore that is included in a well-specific plugging insurance policy described by Section 91.104(c).

#### Section 91.108. Deposit and Use of Funds.

Subject to the refund provisions of Section 91.1091, if applicable, proceeds from bonds and other financial security required pursuant to this chapter and benefits under well-specific plugging insurance policies described by Section 91.104(c) that are paid to the state as contingent beneficiary of the policies shall be deposited in the oil and gas regulation and cleanup fund and, notwithstanding Sections 81.068 and 91.113, may be used only for actual well plugging and surface remediation.

Section 91.109. Financial Security For Persons Involved In Activities Other Than Operation of Wells.

(a) A person applying for or acting under a commission permit to store, handle, treat, reclaim, or dispose of oil and gas waste may be required by the commission to maintain a performance bond or other form of financial security conditioned that the permittee will operate and close the storage, handling, treatment, reclamation, or disposal site in accordance with state law, commission rules, and the permit to operate the site. However, this section does not authorize the commission to require a bond or other form of financial security for saltwater disposal pits, emergency saltwater storage pits (including blow-down pits), collecting pits, or skimming pits provided that such pits are used in conjunction with the operation of an individual oil or gas lease. Subject to the refund provisions of Section 91.1091, proceeds from any bond or other form of financial security required by this section shall be placed in the oil and gas regulation and cleanup fund. Each bond or other form of financial security shall be renewed and continued in effect until the conditions have been met or release is authorized by the commission.

(b) In addition to the financial security requirements of Subsection (a), a person required to file a bond, letter of credit, or cash deposit under Section 91.103 who is involved in activities other than the ownership or operation of wells must file the bond, letter of credit, or cash deposit at the time of filing or renewing an organization report required by Section 91.142 according to the following schedule:

(1) no bond, letter of credit, or cash deposit if the person is a:

- (A) local distribution company;
- (B) gas marketer;
- (C) crude oil nominator;
- (D) first purchaser;
- (E) well servicing company;
- (F) survey company;
- (G) salt water hauler;
- (H) gas nominator;
- (I) gas purchaser; or
- (J) well plugger; or

(2) a bond, letter of credit, or cash deposit in an amount not to exceed \$25,000 if the person is involved in an activity that is not associated with the ownership or operation of wells and is not listed in Subdivision (1).

(c) A person who engages in more than one activity or operation, including well operation, for which a bond, letter of credit, or cash deposit is required under this subchapter is not required to file a separate bond, letter of credit, or cash deposit for each activity or operation in which the person is engaged. The person is required to file a bond, letter of credit, or cash deposit only in the amount required for the activity or operation in which the person engages for which a bond, letter of credit, or cash deposit in the greatest amount is required. The bond, letter of credit, or cash deposit filed covers all of the activities and operations for which a bond, letter of credit, or cash deposit is required under this subchapter.

[Section 91.1091. Refund.](#)

The commission shall refund the proceeds from a bond, letter of credit, or cash deposit required under this subchapter if:

- (1) the conditions that caused the proceeds to be collected are corrected;
- (2) all administrative, civil, and criminal penalties relating to those conditions are paid; and
- (3) the commission has been reimbursed for all costs and expenses incurred by the commission in relation to those conditions.

[Texas Natural Resources Code Section 91.142. Report to Commission.](#)

(a) A person, firm, partnership, joint stock association, corporation, or other domestic or foreign organization operating wholly or partially in this state and acting as principal or agent for another for the purpose of performing operations which are within the jurisdiction of the commission shall file immediately with the commission:

- (1) the name of the company or organization;
- (2) the post-office address of the company or organization;
- (3) the plan under which the company or organization was organized;
- (4) the names and post-office addresses of the trustee or trustees of the company or organization;
- (5) the names, unique identifying numbers such as driver's license numbers, and post-office addresses of the officers and directors; and

- (6) if required by Subsection (b) of this section, the name and address of the resident agent.
- (b) Any foreign or nonresident entity listed in Subsection (a) of this section shall maintain or designate a resident agent upon whom any process, notice, or demand required or permitted by law to be served upon such entity may be served.
- (c) If any such entity required by the terms of this section to maintain or designate such agent shall fail to do so, then and in such event, the organization report required to be filed with the commission is not valid.
- (d) Failure by any such entity listed in Subsection (a) of this section to answer such process or demand shall render the organization report invalid.
- (e) The commission shall require an entity described by Subsection (a) of this section to refile an organization report annually according to a schedule established by the commission.
- (f) If an entity described by Subsection (a) does not maintain on file with the commission an organization report and financial security as required by this chapter:
  - (1) the entity may not perform operations under the jurisdiction of the commission except as necessary to remedy a violation of law or commission rules and as authorized by the commission; and
  - (2) the commission, on written notice, may suspend:
    - (A) any permits held by the entity; or
    - (B) any certificates of compliance approved under Subchapter P.
- (g) An organization report filed under this section must be accompanied by the following fee:
  - (1) for an operator of not more than 25 wells, \$300;
  - (2) for an operator of more than 25 but not more than 100 wells, \$500;
  - (3) for an operator of more than 100 wells, \$1,000;
  - (4) for an operator of one or more natural gas pipelines as classified by the commission, \$225;
  - (5) for an operator of one or more service activities or facilities who does not operate any wells, an amount determined by the commission but not less than \$300 or more than \$500;

- (6) for an operator of one or more liquids pipelines as classified by the commission who does not operate any wells, an amount determined by the commission but not less than \$425 or more than \$625;
- (7) for an operator of one or more service activities or facilities, including liquids pipelines as classified by the commission, who also operates one or more wells, an amount determined by the commission based on the sum of the amounts provided by the applicable subdivisions of this subsection but not less than \$425 or more than \$1,125; and
- (8) for an entity not currently performing operations under the jurisdiction of the commission, \$300.

(h) To enable the commission to better protect the state's resources, an entity described by Subsection (a) or an affiliate of such an entity performing operations within the jurisdiction of the commission that files for federal bankruptcy protection shall give written notice to the commission of that action by submitting the notice to the office of general counsel not later than the 30th day after the date of filing.

## 16 Texas Administrative Code §3.8. Water Protection

(a) The following words and terms when used in this section shall have the following meanings, unless the context clearly indicates otherwise.

- (1) Basic sediment pit--Pit used in conjunction with a tank battery for storage of basic sediment removed from a production vessel or from the bottom of an oil storage tank. Basic sediment pits were formerly referred to as burn pits.
- (2) Brine pit--Pit used for storage of brine which is used to displace hydrocarbons from an underground hydrocarbon storage facility.
- (3) Collecting pit--Pit used for storage of saltwater or other oil and gas wastes prior to disposal at a disposal well or fluid injection well. In some cases, one pit is both a collecting pit and a skimming pit.
- (4) Completion/workover pit--Pit used for storage or disposal of spent completion fluids, workover fluids and drilling fluid, silt, debris, water, brine, oil scum, paraffin, or other materials which have been cleaned out of the wellbore of a well being completed or worked over.
- (5) Drilling fluid disposal pit--Pit, other than a reserve pit, used for disposal of spent drilling fluid.
- (6) Drilling fluid storage pit--Pit used for storage of drilling fluid which is not currently being used but which will be used in future drilling operations. Drilling fluid storage pits are often centrally located among several leases.
- (7) Emergency saltwater storage pit--Pit used for storage of produced saltwater for limited period of time. Use of the pit is necessitated by a temporary shutdown of disposal well or fluid injection well and/or associated equipment, by temporary overflow of saltwater storage tanks

on a producing lease or by a producing well loading up with formation fluids such that the well may die. Emergency saltwater storage pits may sometimes be referred to as emergency pits or blowdown pits.

(8) Flare pit--Pit which contains a flare and which is used for temporary storage of liquid hydrocarbons which are sent to the flare during equipment malfunction but which are not burned. A flare pit is used in conjunction with a gasoline plant, natural gas processing plant, pressure maintenance or repressurizing plant, tank battery, or a well.

(9) Fresh makeup water pit--Pit used in conjunction with a drilling rig for storage of fresh water used to make up drilling fluid or hydraulic fracturing fluid.

(10) Gas plant evaporation/retention pit--Pit used for storage or disposal of cooling tower blowdown, water condensed from natural gas, and other wastewater generated at gasoline plants, natural gas processing plants, or pressure maintenance or repressurizing plants.

(11) Mud circulation pit--Pit used in conjunction with drilling rig for storage of drilling fluid currently being used in drilling operations.

(12) Reserve pit--Pit used in conjunction with drilling rig for collecting spent drilling fluids; cuttings, sands, and silts; and wash water used for cleaning drill pipe and other equipment at the well site. Reserve pits are sometimes referred to as slush pits or mud pits.

(13) Saltwater disposal pit--Pit used for disposal of produced saltwater.

(14) Skimming pit--Pit used for skimming oil off saltwater prior to disposal of saltwater at a disposal well or fluid injection well.

(15) Washout pit--Pit located at a truck yard, tank yard, or disposal facility for storage or disposal of oil and gas waste residue washed out of trucks, mobile tanks, or skid-mounted tanks.

(16) Water condensate pit--Pit used in conjunction with a gas pipeline drip or gas compressor station for storage or disposal of fresh water condensed from natural gas.

(17) Generator--Person who generates oil and gas wastes.

(18) Carrier--Person who transports oil and gas wastes generated by a generator. A carrier of another person's oil and gas wastes may be a generator of his own oil and gas wastes.

(19) Receiver--Person who stores, handles, treats, reclaims, or disposes of oil and gas wastes generated by a generator. A receiver of another person's oil and gas wastes may be a generator of his own oil and gas wastes.

(20) Director--Director of the Oil and Gas Division or his staff delegate designated in writing by the director of the Oil and Gas Division or the commission.

(21) Person--Natural person, corporation, organization, government or governmental subdivision or agency, business trust, estate, trust, partnership, association, or any other legal entity.

(22) Affected person--Person who, as a result of the activity sought to be permitted, has suffered or may suffer actual injury or economic damage other than as a member of the general public.

(23) To dewater--To remove the free water.

(24) To dispose--To engage in any act of disposal subject to regulation by the commission including, but not limited to, conducting, draining, discharging, emitting, throwing, releasing, depositing, burying, landfarming, or allowing to seep, or to cause or allow any such act of disposal.

(25) Landfarming--A waste management practice in which oil and gas wastes are mixed with or applied to the land surface in such a manner that the waste will not migrate off the landfarmed area.

(26) Oil and gas wastes--Materials to be disposed of or reclaimed which have been generated in connection with activities associated with the exploration, development, and production of oil or gas or geothermal resources, as those activities are defined in paragraph (30) of this subsection, and materials to be disposed of or reclaimed which have been generated in connection with activities associated with the solution mining of brine. The term "oil and gas wastes" includes, but is not limited to, saltwater, other mineralized water, sludge, spent drilling fluids, cuttings, waste oil, spent completion fluids, and other liquid, semiliquid, or solid waste material. The term "oil and gas wastes" includes waste generated in connection with activities associated with gasoline plants, natural gas or natural gas liquids processing plants, pressure maintenance plants, or repressurizing plants unless that waste is a hazardous waste as defined by the administrator of the United States Environmental Protection Agency pursuant to the federal Solid Waste Disposal Act, as amended (42 United States Code §6901 et seq.).

(27) Oil field fluids--Fluids to be used or reused in connection with activities associated with the exploration, development, and production of oil or gas or geothermal resources, fluids to be used or reused in connection with activities associated with the solution mining of brine, and mined brine. The term "oil field fluids" includes, but is not limited to, drilling fluids, completion fluids, surfactants, and chemicals used to detoxify oil and gas wastes.

(28) Pollution of surface or subsurface water--The alteration of the physical, thermal, chemical, or biological quality of, or the contamination of, any surface or subsurface water in the state that renders the water harmful, detrimental, or injurious to humans, animal life, vegetation, or property, or to public health, safety, or welfare, or impairs the usefulness or the public enjoyment of the water for any lawful or reasonable purpose.

(29) Surface or subsurface water--Groundwater, percolating or otherwise, and lakes, bays, ponds, impounding reservoirs, springs, rivers, streams, creeks, estuaries, marshes, inlets, canals, the Gulf of Mexico inside the territorial limits of the state, and all other bodies of surface water, natural or artificial, inland or coastal, fresh or salt, navigable or nonnavigable, and including the beds and banks of all watercourses and bodies of surface water, that are wholly or partially inside or bordering the state or inside the jurisdiction of the state.

(30) Activities associated with the exploration, development, and production of oil or gas or geothermal resources--Activities associated with:

(A) the drilling of exploratory wells, oil wells, gas wells, or geothermal resource wells;

(B) the production of oil or gas or geothermal resources, including:

(i) activities associated with the drilling of injection water source wells that penetrate the base of usable quality water;

(ii) activities associated with the drilling of cathodic protection holes associated with the cathodic protection of wells and pipelines subject to the jurisdiction of the commission to regulate the production of oil or gas or geothermal resources;

(iii) activities associated with gasoline plants, natural gas or natural gas liquids processing plants, pressure maintenance plants, or repressurizing plants;

(iv) activities associated with any underground natural gas storage facility, provided the terms "natural gas" and "storage facility" shall have the meanings set out in the Texas Natural Resources Code, §91.173;

(v) activities associated with any underground hydrocarbon storage facility, provided the terms "hydrocarbons" and "underground hydrocarbon storage facility" shall have the meanings set out in the Texas Natural Resources Code, §91.201; and

(vi) activities associated with the storage, handling, reclamation, gathering, transportation, or distribution of oil or gas prior to the refining of such oil or prior to the use of such gas in any manufacturing process or as a residential or industrial fuel;

(C) the operation, abandonment, and proper plugging of wells subject to the jurisdiction of the commission to regulate the exploration, development, and production of oil or gas or geothermal resources; and

(D) the discharge, storage, handling, transportation, reclamation, or disposal of waste or any other substance or material associated with any activity listed in subparagraphs (A) - (C) of this paragraph, except for waste generated in connection with activities associated with gasoline plants, natural gas or natural gas liquids processing plants, pressure maintenance plants, or repressurizing plants if that waste is a hazardous waste as defined by the administrator of the United States Environmental Protection Agency pursuant to the federal Solid Waste Disposal Act, as amended (42 United States Code §6901, et seq.).

(31) Mined brine--Brine produced from a brine mining injection well by solution of subsurface salt formations. The term "mined brine" does not include saltwater produced incidentally to the exploration, development, and production of oil or gas or geothermal resources.

(32) Brine mining pit--Pit, other than a fresh mining water pit, used in connection with activities associated with the solution mining of brine. Most brine mining pits are used to store mined brine.

(33) Fresh mining water pit--Pit used in conjunction with a brine mining injection well for storage of water used for solution mining of brine.

(34) Inert wastes--Nonreactive, nontoxic, and essentially insoluble oil and gas wastes, including, but not limited to, concrete, glass, wood, metal, wire, plastic, fiberglass, and trash.

(35) Coastal zone--The area within the boundary established in Title 31, Texas Administrative Code, §503.1 (Coastal Management Program Boundary).

- (36) Coastal management program (CMP) rules--The enforceable rules of the Texas Coastal Management Program codified at Title 31, Texas Administrative Code, Chapters 501, 505, and 506.
- (37) Coastal natural resource area (CNRA)--One of the following areas defined in Texas Natural Resources Code, §33.203: coastal barriers, coastal historic areas, coastal preserves, coastal shore areas, coastal wetlands, critical dune areas, critical erosion areas, gulf beaches, hard substrate reefs, oyster reefs, submerged land, special hazard areas, submerged aquatic vegetation, tidal sand or mud flats, water in the open Gulf of Mexico, and water under tidal influence.
- (38) Coastal waters--Waters under tidal influence and waters of the open Gulf of Mexico.
- (39) Critical area--A coastal wetland, an oyster reef, a hard substrate reef, submerged aquatic vegetation, or a tidal sand or mud flat as defined in Texas Natural Resources Code, §33.203.
- (40) Practicable--Available and capable of being done after taking into consideration existing technology, cost, and logistics in light of the overall purpose of the activity.
- (41) Non-commercial fluid recycling--The recycling of fluid produced from an oil or gas well, including produced formation fluid, workover fluid, and completion fluid, including fluids produced from the hydraulic fracturing process on an existing commission-designated lease or drilling unit associated with a commission-issued drilling permit or upon land leased or owned by the operator for the purposes of operation of a non-commercial disposal well operated pursuant to a permit issued under §3.9 of this title (relating to Disposal Wells) or a non-commercial injection well operated pursuant to a permit issued under §3.46 of this title (relating to Fluid Injection into Productive Reservoirs), where the operator of the lease, or drilling unit, or non-commercial disposal or injection well treats or contracts with a person for the treatment of the fluid, and may accept such fluid from other leases and or operators.
- (42) Non-commercial fluid recycling pit--Pit used in conjunction with one or more oil or gas leases or units that is constructed, maintained, and operated by the operator of record of the lease or unit and is located on an existing commission-designated lease or drilling unit associated with a commission-issued drilling permit, or upon land leased or owned by the operator for the purposes of operation of a non-commercial disposal well operated pursuant to a permit issued under §3.9 of this title or a non-commercial injection well operated pursuant to a permit issued under §3.46 of this title, for the storage of fluid for the purpose of non-commercial fluid recycling or for the storage of treated fluid.
- (43) Recycle--To process and/or use or re-use oil and gas wastes as a product for which there is a legitimate commercial use and the actual use of the recyclable product. 'Recycle,' as defined in this subsection, does not include injection pursuant to a permit issued under §3.46 of this title.
- (44) Treated fluid--Fluid that has been treated using water treatment technologies to remove impurities such that the treated fluid can be reused or recycled. Treated fluid is not a waste but may become a waste if it is abandoned or disposed of rather than reused or recycled.
- (45) Recyclable product--A reusable material as defined in §4.204(12) of this title (relating to Definitions).

(46) 100-year flood plain--An area that is inundated by a 100-year flood, which is a flood that has a one percent or greater chance of occurring in any given year, as determined from maps or other data from the Federal Emergency Management Administration (FEMA), or, if not mapped by FEMA, from the United States Department of Agriculture soil maps.

(47) Distilled water--Water that has been purified by being heated to a vapor form and then condensed into another container as liquid water that is essentially free of all solutes.

(b) No pollution. No person conducting activities subject to regulation by the commission may cause or allow pollution of surface or subsurface water in the state.

(c) Exploratory wells. Any oil, gas, or geothermal resource well or well drilled for exploratory purposes shall be governed by the provisions of statewide or field rules which are applicable and pertain to the drilling, safety, casing, production, abandoning, and plugging of wells.

(d) Pollution control.

(1) Prohibited disposal methods. Except for those disposal methods authorized for certain wastes by paragraph (3) of this subsection, subsection (e) of this section, or §3.98 of this title (relating to Standards for Management of Hazardous Oil and Gas Waste), or disposal methods required to be permitted pursuant to §3.9 of this title (relating to Disposal Wells) (Rule 9) or §3.46 of this title (relating to Fluid Injection into Productive Reservoirs) (Rule 46), no person may dispose of any oil and gas wastes by any method without obtaining a permit to dispose of such wastes. The disposal methods prohibited by this paragraph include, but are not limited to, the unpermitted discharge of oil field brines, geothermal resource waters, or other mineralized waters, or drilling fluids into any watercourse or drainageway, including any drainage ditch, dry creek, flowing creek, river, or any other body of surface water.

(2) Prohibited pits. No person may maintain or use any pit for storage of oil or oil products. Except as authorized by this subsection, no person may maintain or use any pit for storage of oil field fluids, or for storage or disposal of oil and gas wastes, without obtaining a permit to maintain or use the pit. A person is not required to have a permit to use a pit if a receiver has such a permit, if the person complies with the terms of such permit while using the pit, and if the person has permission of the receiver to use the pit. The pits required by this paragraph to be permitted include, but are not limited to, the following types of pits: saltwater disposal pits; emergency saltwater storage pits; collecting pits; skimming pits; brine pits; brine mining pits; drilling fluid storage pits (other than mud circulation pits); drilling fluid disposal pits (other than reserve pits or slush pits); washout pits; and gas plant evaporation/retention pits. If a person maintains or uses a pit for storage of oil field fluids, or for storage or disposal of oil and gas wastes, and the use or maintenance of the pit is neither authorized by this subsection nor permitted, then the person maintaining or using the pit shall backfill and compact the pit in the time and manner required by the director. Prior to backfilling the pit, the person maintaining or using the pit shall, in a permitted manner or in a manner authorized by paragraph (3) of this subsection, dispose of all oil and gas wastes which are in the pit.

(3) Authorized disposal methods.

(A) Fresh water condensate. A person may, without a permit, dispose of fresh water which has been condensed from natural gas and collected at gas pipeline drips or gas compressor stations, provided the disposal is by a method other than disposal into surface water of the state.

(B) Inert wastes. A person may, without a permit, dispose of inert and essentially insoluble oil and gas wastes including, but not limited to, concrete, glass, wood, and wire, provided the disposal is by a method other than disposal into surface water of the state.

(C) Low chloride drilling fluid. A person may, without a permit, dispose of the following oil and gas wastes by landfarming, provided the wastes are disposed of on the same lease where they are generated, and provided the person has the written permission of the surface owner of the tract where landfarming will occur: water base drilling fluids with a chloride concentration of 3,000 milligrams per liter (mg/liter) or less; drill cuttings, sands, and silts obtained while using water base drilling fluids with a chloride concentration of 3,000 mg/liter or less; and wash water used for cleaning drill pipe and other equipment at the well site.

(D) Other drilling fluid. A person may, without a permit, dispose of the following oil and gas wastes by burial, provided the wastes are disposed of at the same well site where they are generated: water base drilling fluid which had a chloride concentration in excess of 3,000 mg/liter but which have been dewatered; drill cuttings, sands, and silts obtained while using oil base drilling fluids or water base drilling fluids with a chloride concentration in excess of 3,000 mg/liter; and those drilling fluids and wastes allowed to be landfarmed without a permit.

(E) Completion/workover pit wastes. A person may, without a permit, dispose of the following oil and gas wastes by burial in a completion/workover pit, provided the wastes have been dewatered, and provided the wastes are disposed of at the same well site where they are generated: spent completion fluids, workover fluids, and the materials cleaned out of the wellbore of a well being completed or worked over.

(F) Contents of non-commercial fluid recycling pit. A person may, without a permit, dispose of the solids from a non-commercial fluid recycling pit by burial in the pit, provided the pit has been dewatered.

(G) Effect on backfilling. A person's choice to dispose of a waste by methods authorized by this paragraph shall not extend the time allowed for backfilling any reserve pit, mud circulation pit, or completion/workover pit whose use or maintenance is authorized by paragraph (4) of this subsection.

(4) Authorized pits. A person may, without a permit, maintain or use reserve pits, mud circulation pits, completion/workover pits, basic sediment pits, flare pits, fresh makeup water pits, fresh mining water pits, non-commercial fluid recycling pits, and water condensate pits on the following conditions.

(A) Reserve pits and mud circulation pits. A person shall not deposit or cause to be deposited into a reserve pit or mud circulation pit any oil field fluids or oil and gas wastes, other than the following:

- (i) drilling fluids, whether fresh water base, saltwater base, or oil base;
- (ii) drill cuttings, sands, and silts separated from the circulating drilling fluids;
- (iii) wash water used for cleaning drill pipe and other equipment at the well site;

- (iv) drill stem test fluids; and
- (v) blowout preventer test fluids.

(B) Completion/workover pits. A person shall not deposit or cause to be deposited into a completion/workover pit any oil field fluids or oil and gas wastes other than spent completion fluids, workover fluid, and the materials cleaned out of the wellbore of a well being completed or worked over.

(C) Basic sediment pits. A person shall not deposit or cause to be deposited into a basic sediment pit any oil field fluids or oil and gas wastes other than basic sediment removed from a production vessel or from the bottom of an oil storage tank. Although a person may store basic sediment in a basic sediment pit, a person may not deposit oil or free saltwater in the pit. The total capacity of a basic sediment pit shall not exceed a capacity of 50 barrels. The area covered by a basic sediment pit shall not exceed 250 square feet.

(D) Flare pits. A person shall not deposit or cause to be deposited into a flare pit any oil field fluids or oil and gas wastes other than the hydrocarbons designed to go to the flare during upset conditions at the well, tank battery, or gas plant where the pit is located. A person shall not store liquid hydrocarbons in a flare pit for more than 48 hours at a time.

(E) Fresh makeup water pits and fresh mining water pits. A person shall not deposit or cause to be deposited into a fresh makeup water pit any oil and gas wastes or any oil field fluids other than fresh water used to make up drilling fluid or hydraulic fracturing fluid. A person shall not deposit or cause to be deposited into a fresh mining water pit any oil and gas wastes or any oil field fluids other than water used for solution mining of brine.

(F) Water condensate pits. A person shall not deposit or cause to be deposited into a water condensate pit any oil field fluids or oil and gas wastes other than fresh water condensed from natural gas and collected at gas pipeline drips or gas compressor stations.

(G) Non-commercial fluid recycling pits.

- (i) A person shall not deposit or cause to be deposited into a non-commercial fluid recycling pit any oil field fluids or oil and gas wastes other than those fluids described in subsection (a)(42) of this section.
- (ii) All pits shall be sufficiently large to ensure adequate storage capacity and freeboard taking into account anticipated precipitation.
- (iii) All pits shall be designed to prevent stormwater runoff from entering the pit. If a pit is constructed with a dike or berm, the height, slope, and construction material of such dike or berm shall be such that it is structurally sound and does not allow seepage.
- (iv) A freeboard of at least two feet shall be maintained at all times.
- (v) All pits shall be lined. The liner shall be designed, constructed, and installed to prevent any migration of materials from the pit into adjacent subsurface soils, ground water, or surface water at any time during the life of the pit. The

liner shall be installed according to standard industry practices, shall be constructed of materials that have sufficient chemical and physical properties, including thickness, to prevent failure during the expected life of the pit. All liners shall have a hydraulic conductivity that is  $1.0 \times 10^{-7}$  cm/sec or less. A liner may be constructed of either natural or synthetic materials.

(I) Procedures shall be in place to routinely monitor the integrity of the liner of pit. If liner failure is discovered at any time, the pit shall be emptied and the liner repaired prior to placing the pit back in service. Acceptable monitoring procedures include an annual visual inspection of the pit liner or the installation of a double liner and leak detection system. Alternative monitoring procedures may be approved by the director if the operator demonstrates that the alternative is at least equivalent in the protection of surface and subsurface water as the provisions of this section.

(II) The liner of a pit with a single liner shall be inspected annually to ensure that the liner has not failed. This inspection shall be completed by emptying the pit and visually inspecting the liner.

(III) If the operator does not propose to empty the pit and inspect the pit liner on at least an annual basis, the operator shall install a double liner and leak detection system. A leak detection system shall be installed between a primary and secondary liner. The leak detection system must be monitored on a monthly basis to determine if the primary liner has failed. The primary liner has failed if the volume of water passing through the primary liner exceeds the action leakage rate, as calculated using accepted procedures, or 1,000 gallons per acre per day, whichever is larger.

(IV) The operator of the pit shall keep records to demonstrate compliance with the pit liner integrity requirements and shall make the records available to commission personnel upon request.

(vi) The operator of the pit shall provide written notification to the district director prior to construction of the pit, or prior to the use of an existing pit as a non-commercial fluid recycling pit. Such notification shall include:

(I) the location of the pit including the lease name and number or drilling permit number and the latitude and longitude;

(II) the dimensions and maximum capacity of the pit; and

(III) a signed statement that the operator has written permission from the surface owner of the tract upon which the pit is located for construction and use of the pit for such purpose.

(vii) Equipment, machinery, waste, or other materials that could reasonably be expected to puncture, tear, or otherwise compromise the integrity of the liner shall not be used or placed in lined pits.

(viii) The pit shall be inspected periodically by the operator for compliance with the applicable provisions of this section.

(H) Backfill requirements.

(i) A person who maintains or uses a reserve pit, mud circulation pit, fresh makeup water pit, fresh mining water pit, completion/workover pit, basic sediment pit, flare pit, non-commercial fluid recycling pit, or water condensate pit shall dewater, backfill, and compact the pit according to the following schedule.

(I) Reserve pits and mud circulation pits which contain fluids with a chloride concentration of 6,100 mg/liter or less and fresh makeup water pits shall be dewatered, backfilled, and compacted within one year of cessation of drilling operations.

(II) Reserve pits and mud circulation pits which contain fluids with a chloride concentration in excess of 6,100 mg/liter shall be dewatered within 30 days and backfilled and compacted within one year of cessation of drilling operations.

(III) All completion/workover pits used when completing a well shall be dewatered within 30 days and backfilled and compacted within 120 days of well completion. All completion/workover pits used when working over a well shall be dewatered within 30 days and backfilled and compacted within 120 days of completion of workover operations.

(IV) Basic sediment pits, flare pits, fresh mining water pits, non-commercial fluid recycling pits, and water condensate pits shall be dewatered, backfilled, and compacted within 120 days of final cessation of use of the pits.

(V) If a person constructs a sectioned reserve pit, each section of the pit shall be considered a separate pit for determining when a particular section should be dewatered.

(ii) A person who maintains or uses a reserve pit, mud circulation pit, fresh makeup water pit, non-commercial fluid recycling pit, or completion/workover pit shall remain responsible for dewatering, backfilling, and compacting the pit within the time prescribed by clause (i) of this subparagraph, even if the time allowed for backfilling the pit extends beyond the expiration date or transfer date of the lease covering the land where the pit is located.

(iii) The director may require that a person who uses or maintains a reserve pit, mud circulation pit, fresh makeup water pit, fresh mining water pit, completion/workover pit, basic sediment pit, flare pit, non-commercial fluid recycling pit, or water condensate pit backfill the pit sooner than the time prescribed by clause (i) of this subparagraph if the director determines that oil and gas wastes or oil field fluids are likely to escape from the pit or that the pit is being used for improper storage or disposal of oil and gas wastes or oil field fluids.

(iv) Prior to backfilling any reserve pit, mud circulation pit, completion/workover pit, basic sediment pit, flare pit, non-commercial fluid recycling pit, or water condensate pit whose use or maintenance is authorized by this paragraph, the person maintaining or using the pit shall, in a permitted manner or in a manner authorized by paragraph (3) of this subsection, dispose of all oil and gas wastes which are in the pit.

(I) Unless otherwise approved by the district director after a showing that the fluids will be confined in the pit at all times, all authorized pits shall be constructed, used, operated, and maintained at all times outside of a 100-year flood plain as that term is defined in subsection (a) of this section. The operator may request a hearing if the district director denies approval of the request to construct a pit within a 100-year flood plain.

(II) In the event of an unauthorized discharge from any pit authorized by this paragraph, the operator shall take any measures necessary to stop or control the discharge and report the discharge to the district office as soon as possible.

(5) Responsibility for disposal.

(A) Permit required. No generator or receiver may knowingly utilize the services of a carrier to transport oil and gas wastes if the carrier is required by this rule to have a permit to transport such wastes but does not have such a permit. No carrier may knowingly utilize the services of a second carrier to transport oil and gas wastes if the second carrier is required by this rule to have a permit to transport such wastes but does not have such a permit. No generator or carrier may knowingly utilize the services of a receiver to store, handle, treat, reclaim, or dispose of oil and gas wastes if the receiver is required by statute or commission rule to have a permit to store, handle, treat, reclaim, or dispose of such wastes but does not have such a permit. No receiver may knowingly utilize the services of a second receiver to store, handle, treat, reclaim, or dispose of oil and gas wastes if the second receiver is required by statute or commission rule to have a permit to store, handle, treat, reclaim, or dispose of such wastes but does not have such a permit. Any person who plans to utilize the services of a carrier or receiver is under a duty to determine that the carrier or receiver has all permits required by the Oil and Gas Division to transport, store, handle, treat, reclaim, or dispose of oil and gas wastes.

(B) Improper disposal prohibited. No generator, carrier, receiver, or any other person may improperly dispose of oil and gas wastes or cause or allow the improper disposal of oil and gas wastes. A generator causes or allows the improper disposal of oil and gas wastes if:

- (i) the generator utilizes the services of a carrier or receiver who improperly disposes of the wastes; and
- (ii) the generator knew or reasonably should have known that the carrier or receiver was likely to improperly dispose of the wastes and failed to take reasonable steps to prevent the improper disposal.

(6) Permits.

(A) Standards for permit issuance. A permit to maintain or use a pit for storage of oil field fluids or oil and gas wastes may only be issued if the commission determines that the maintenance or use of such pit will not result in the waste of oil, gas, or geothermal resources or the pollution of surface or subsurface waters. A permit to dispose of oil and gas wastes by any method, including disposal into a pit, may only be issued if the commission determines that the disposal will not result in the waste of oil, gas, or geothermal resources or the pollution of surface or subsurface water. A permit to maintain or use any unlined brine mining pit or any unlined pit, other than an emergency saltwater storage pit, for storage or disposal of oil field brines, geothermal resource waters, or other mineralized waters may only be issued if the commission determines that the applicant has conclusively shown that use of the pit cannot cause pollution of surrounding productive agricultural land nor pollution of surface or subsurface water, either because there is no surface or subsurface water in the area of the pit, or because the surface or subsurface water in the area of the pit would be physically isolated by naturally occurring impervious barriers from any oil and gas wastes which might escape or migrate from the pit. Permits issued pursuant to this paragraph will contain conditions reasonably necessary to prevent the waste of oil, gas, or geothermal resources and the pollution of surface and subsurface waters. A permit to maintain or use a pit will state the conditions under which the pit may be operated, including the conditions under which the permittee shall be required to dewater, backfill, and compact the pit. Any permits issued pursuant to this paragraph may contain requirements concerning the design and construction of pits and disposal facilities, including requirements relating to pit construction materials, dike design, liner material, liner thickness, procedures for installing liners, schedules for inspecting and/or replacing liners, overflow warning devices, leak detection devices, and fences. However, a permit to maintain or use any lined brine mining pit or any lined pit for storage or disposal of oil field brines, geothermal resource waters, or other mineralized waters will contain requirements relating to liner material, liner thickness, procedures for installing liners, and schedules for inspecting and/or replacing liners.

(B) Application. An application for a permit to maintain or use a pit or to dispose of oil and gas wastes shall be filed with the commission in Austin. The applicant shall mail or deliver a copy of the application to the appropriate district office on the same day the original application is mailed or delivered to the commission in Austin. A permit application shall be considered filed with the commission on the date it is received by the commission in Austin. When a commission-prescribed application form exists, an applicant shall make application on the prescribed form according to the instructions on such form. The director may require the applicant to provide the commission with engineering, geological, or other information which the director deems necessary to show that issuance of the permit will not result in the waste of oil, gas, or geothermal resources or the pollution of surface or subsurface water.

(C) Notice. The applicant shall give notice of the permit application to the surface owners of the tract upon which the pit will be located or upon which the disposal will take place. When the tract upon which the pit will be located or upon which the disposal will take place lies within the corporate limits of an incorporated city, town, or village, the applicant shall also give notice to the city clerk or other appropriate official. Where

disposal is to be by discharge into a watercourse other than the Gulf of Mexico or a bay, the applicant shall also give notice to the surface owners of each waterfront tract between the discharge point and 1/2 mile downstream of the discharge point except for those waterfront tracts within the corporate limits of an incorporated city, town, or village. When one or more waterfront tracts within 1/2 mile of the discharge point lie within the corporate limits of an incorporated city, town, or village, the applicant shall give notice to the city clerk or other appropriate official. Notice of the permit application shall consist of a copy of the application together with a statement that any protest to the application should be filed with the commission within 15 days of the date the application is filed with the commission. The applicant shall mail or deliver the required notice to the surface owners and the city clerk or other appropriate official on or before the date the application is mailed or delivered to the commission in Austin. If, in connection with a particular application, the director determines that another class of persons, such as offset operators, adjacent surface owners, or an appropriate river authority, should receive notice of the application, the director may require the applicant to mail or deliver notice to members of that class. If the director determines that, after diligent efforts, the applicant has been unable to ascertain the name and address of one or more persons required by this subparagraph to be notified, then the director may authorize the applicant to notify such persons by publishing notice of the application. The director shall determine the form of the notice to be published. The notice shall be published once each week for two consecutive weeks by the applicant in a newspaper of general circulation in the county where the pit will be located or the disposal will take place. The applicant shall file proof of publication with the commission in Austin. The director will consider the applicant to have made diligent efforts to ascertain the names and addresses of surface owners required by this subparagraph to be notified if the applicant has examined the current county tax rolls and investigated other reliable and readily available sources of information.

(D) Protests and hearings. If a protest from an affected person is made to the commission within 15 days of the date the application is filed, then a hearing shall be held on the application after the applicant requests a hearing. If the director has reason to believe that a person entitled to notice of an application has not received such notice within 15 days of the date an application is filed with the commission, then the director shall not take action on the application until reasonable efforts have been made to give such person notice of the application and an opportunity to file a protest to the application. If the director determines that a hearing is in the public interest, a hearing shall be held. A hearing on an application shall be held after the commission provides notice of hearing to all affected persons, or other persons or governmental entities who express an interest in the application in writing. If no protest from an affected person is received by the commission, the director may administratively approve the application. If the director denies administrative approval, the applicant shall have a right to a hearing upon request. After hearing, the hearings examiner shall recommend a final action by the commission.

(E) Modification, suspension, and termination. A permit granted pursuant to this subsection, may be modified, suspended, or terminated by the commission for good cause after notice and opportunity for hearing. A finding of any of the following facts shall constitute good cause:

- (i) pollution of surface or subsurface water is occurring or is likely to occur as a result of the permitted operations;
- (ii) waste of oil, gas, or geothermal resources is occurring or is likely to occur as a result of the permitted operations;
- (iii) the permittee has violated the terms and conditions of the permit or commission rules;
- (iv) the permittee misrepresented any material fact during the permit issuance process;
- (v) the permittee failed to give the notice required by the commission during the permit issuance process;
- (vi) a material change of conditions has occurred in the permitted operations, or the information provided in the application has changed materially.

(F) Emergency permits. If the director determines that expeditious issuance of the permit will prevent or is likely to prevent the waste of oil, gas, or geothermal resources or the pollution of surface or subsurface water, the director may issue an emergency permit. An application for an emergency permit to use or maintain a pit or to dispose of oil and gas wastes shall be filed with the commission in the appropriate district office. Notice of the application is not required. If warranted by the nature of the emergency, the director may issue an emergency permit based upon a verbal application, or the director may verbally authorize an activity before issuing a written permit authorizing that activity. An emergency permit is valid for up to 30 days, but may be modified, suspended, or terminated by the director at any time for good cause without notice and opportunity for hearing. Except when the provisions of this subparagraph are to the contrary, the issuance, denial, modification, suspension, or termination of an emergency permit shall be governed by the provisions of subparagraphs (A) - (E) of this paragraph.

(G) Minor permits. If the director determines that an application is for a permit to store only a minor amount of oil field fluids or to store or dispose of only a minor amount of oil and gas waste, the director may issue a minor permit provided the permit does not authorize an activity which results in waste of oil, gas, or geothermal resources or pollution of surface or subsurface water. An application for a minor permit shall be filed with the commission in the appropriate district office. Notice of the application shall be given as required by the director. The director may determine that notice of the application is not required. A minor permit is valid for 60 days, but a minor permit which is issued without notice of the application may be modified, suspended, or terminated by the director at any time for good cause without notice and opportunity for hearing. Except when the provisions of this subparagraph are to the contrary, the issuance, denial, modification, suspension, or termination of a minor permit shall be governed by the provisions of subparagraphs (A) - (E) of this paragraph.

(7) Recycling.

(A) Prohibited recycling. Except for those recycling methods authorized for certain wastes by subparagraph (B) of this paragraph, no person may recycle any oil and gas wastes by any method without obtaining a permit.

(B) Authorized recycling.

- (i) No permit is required if treated fluid is recycled for use as makeup water for a hydraulic fracturing fluid treatment(s), or as another type of oilfield fluid to be used in the wellbore of an oil, gas, geothermal, or service well.
- (ii) Treated fluid may be reused in any other manner, other than discharge to waters of the state, without a permit from the Commission, provided the reuse occurs pursuant to a permit issued by another state or federal agency.
- (iii) If treatment of the fluid results in distilled water, no permit is required to use the resulting distilled water in any manner other than discharge to waters of the state.
- (iv) Fluid that meets the requirements of clause (i), (ii), or (iii) of this subparagraph is a recyclable product.

(C) Permitted recycling.

- (i) Treated fluid may be reused in any manner, other than the manner authorized by subparagraph (B) of this paragraph, pursuant to a permit issued by the director on a case-by-case basis, taking into account the source of the fluids, the anticipated constituents of concern, the volume of fluids, the location, and the proposed reuse of the treated fluids. Fluid that meets the requirements of a permit issued under this clause is a recyclable product.
- (ii) All commercial recycling requires the commercial recycler of the oil and gas waste to obtain a permit in accordance with Chapter 4, Subchapter B of this title (relating to Commercial Recycling).

(8) Used oil. Used oil as defined in §3.98 of this title, shall be managed in accordance with the provisions of 40 CFR, Part 279.

(e) Pollution prevention (reference Order Number 20-59,200, effective May 1, 1969).

(1) The operator shall not pollute the waters of the Texas offshore and adjacent estuarine zones (saltwater bearing bays, inlets, and estuaries) or damage the aquatic life therein.

(2) All oil, gas, and geothermal resource well drilling and producing operations shall be conducted in such a manner to preclude the pollution of the waters of the Texas offshore and adjacent estuarine zones. Particularly, the following procedures shall be utilized to prevent pollution.

(A) The disposal of liquid waste material into the Texas offshore and adjacent estuarine zones shall be limited to saltwater and other materials which have been treated, when necessary, for the removal of constituents which may be harmful to aquatic life or injurious to life or property.

(B) No oil or other hydrocarbons in any form or combination with other materials or constituent shall be disposed of into the Texas offshore and adjacent estuarine zones.

(C) All deck areas on drilling platforms, barges, workover unit, and associated equipment both floating and stationary subject to contamination shall be either curbed and

connected by drain to a collecting tank, sump, or enclosed drilling slot in which the containment will be treated and disposed of without causing hazard or pollution; or else drip pans, or their equivalent, shall be placed under any equipment which might reasonably be considered a source from which pollutants may escape into surrounding water. These drip pans must be piped to collecting tanks, sumps, or enclosed drilling slots to prevent overflow or prevent pollution of the surrounding water.

(D) Solid combustible waste may be burned and the ashes may be disposed of into Texas offshore and adjacent estuarine zones. Solid wastes such as cans, bottles, or any form of trash must be transported to shore in appropriate containers. Edible garbage, which may be consumed by aquatic life without harm, may be disposed of into Texas offshore and adjacent estuarine zones.

(E) Drilling muds which contain oil shall be transported to shore or a designated area for disposal. Only oil-free cutting and fluids from mud systems may be disposed of into Texas offshore and adjacent estuarine zones at or near the surface.

(F) Fluids produced from offshore wells shall be mechanically contained in adequately pressure-controlled piping or vessels from producing well to disposition point. Oil and water separation facilities at offshore and onshore locations shall contain safeguards to prevent emission of pollutants to the Texas offshore and adjacent estuarine zones prior to proper treatment.

(G) All deck areas on producing platforms subject to contamination shall be either curbed and connected by drain to a collecting tank or sump in which the containment will be treated and disposed of without causing hazard or pollution, or else drip pans, or their equivalent, shall be placed under any equipment which might reasonably be considered a source from which pollutants may escape into surrounding water. These drip pans must be piped to collecting tanks or sumps designed to accommodate all reasonably expected drainage. Satisfactory means must be provided to empty the sumps to prevent overflow.

(H) Any person observing water pollution shall report such sighting, noting size, material, location, and current conditions to the ranking operating personnel. Immediate action or notification shall be made to eliminate further pollution. The operator shall then transmit the report to the appropriate commission district office.

(I) Immediate corrective action shall be taken in all cases where pollution has occurred. An operator responsible for the pollution shall remove immediately such oil, oil field waste, or other pollution materials from the waters and the shoreline where it is found. Such removal operations will be at the expense of the responsible operator.

(3) The commission may suspend producing and/or drilling operations from any facility when it appears that the provisions of this rule are being violated.

(4) (Reference Order Number 20-60,214, effective October 1, 1970.) The foregoing provisions of Rule 8(D) shall also be required and enforced as to all oil, gas, or geothermal resource operations conducted on the inland and fresh waters of the State of Texas, such as lakes, rivers, and streams.

(f) Oil and gas waste haulers.

(1) A person who transports oil and gas waste for hire by any method other than by pipeline shall not haul or dispose of oil and gas waste off a lease, unit, or other oil or gas property where it is generated unless such transporter has qualified for and been issued an oil and gas waste hauler permit by the commission. Hauling of inert waste, asbestos-containing material regulated under the Clean Air Act (42 USC §§7401 et seq), polychlorinated biphenyl (PCB) waste regulated under the Toxic Substances Control Act (15 USCA §§2601 et seq), or hazardous oil and gas waste subject to regulation under §3.98 of this title is excluded from this subsection. This subsection is not applicable to the non-commercial hauling of oil and gas wastes for non-commercial recycling. For purposes of this subsection, injection of salt water or other oil and gas waste into an oil and gas reservoir for purposes of enhanced recovery does not qualify as recycling.

(A) Application for an oil and gas waste hauler permit will be made on the commission-prescribed form, and in accordance with the instructions thereon, and must be accompanied by:

- (i) the permit application fee required by §3.78 of this title (relating to Fees and Financial Security Requirements) (Statewide Rule 78);
- (ii) vehicle identification information to support commission issuance of an approved vehicle list;
- (iii) an affidavit from the operator of each commission-permitted disposal system the hauler intends to use stating that the hauler has permission to use the system; and
- (iv) a certification by the hauler that the vehicles listed on the application are designed so that they will not leak during transportation. The certification shall include a statement that vehicles used to haul non-solid oil and gas waste shall be designed to transport non-solid oil and gas wastes, and shall be operated and maintained to prevent the escape of oil and gas waste.

(B) An oil and gas waste hauler permit may be issued for a term not to exceed one year, subject to renewal by the filing of an application for permit renewal and the required application fee for the next permit period. The term of an oil and gas waste hauler permit will be established in accordance with a schedule prescribed by the director to allow for the orderly and timely renewal of oil and gas waste hauler permits on a staggered basis.

(C) Each oil and gas waste hauler shall operate in strict compliance with the instructions and conditions stated on the permit which provide:

- (i) This permit, unless suspended or revoked for cause shown, shall remain valid until the expiration date specified in this permit.
- (ii) Each vehicle used by a permittee shall be marked on both sides and the rear with the permittee's name and permit number in characters not less than three inches high. (For the purposes of this permit, "vehicle" means any truck tank, trailer tank, tank car, vacuum truck, dump truck, garbage truck, or other container in which oil and gas waste will be hauled by the permittee.)
- (iii) Each vehicle must carry a copy of the permit including those parts of the commission-issued attachments listing approved vehicles and commission-

permitted disposal systems that are relevant to that vehicle's activities. This permit authority is limited to those vehicles shown on the commission-issued list of approved vehicles.

(iv) This permit is issued pursuant to the information furnished on the application form, and any change in conditions must be reported to the commission on an amended application form. The permit authority will be revised as required by the amended application.

(v) This permit authority is limited to hauling, handling, and disposal of oil and gas waste.

(vi) This permit authorizes the permittee to use commission-permitted disposal systems for which the permittee has submitted affidavits from the disposal system operators stating that the permittee has permission to use the systems. These disposal systems are listed as an attachment to the permit. This permit also authorizes the permittee to use a disposal system operated under authority of a minor permit issued by the commission without submitting an affidavit from the disposal system operator. In addition, this permit authorizes the permittee to transport hazardous oil and gas waste to any facility in accordance with the provisions of §3.98 of this title, provided the shipment is accompanied by a manifest. Finally, this permit authorizes the transportation of oil and gas waste to a disposal facility permitted by another agency or another state provided the commission has granted separate authorization for the disposal.

(vii) The permittee must file an application for a renewal permit, using the permittee's assigned permit number, before the expiration date specified in this permit.

(viii) The permittee must compile and keep current a list of all persons by whom the permittee is hired to haul and dispose of oil and gas waste, and furnish such list to the commission upon request.

(ix) Each vehicle must be operated and maintained in such a manner as to prevent spillage, leakage, or other escape of oil and gas waste during transportation. Vehicles used to haul non-solid oil and gas waste shall be designed to transport non-solid oil and gas wastes, and shall be operated and maintained to prevent the escape of oil and gas waste.

(x) Each vehicle must be made available for inspection upon request by commission personnel.

(2) A record shall be kept by each oil and gas waste hauler showing daily oil and gas waste hauling operations under the permitted authority.

(A) Such daily record shall be dated and signed by the vehicle driver and shall show the following information:

(i) identity of the property from which the oil and gas waste is hauled;

(ii) identity of the disposal system or commercial recycling facility to which the oil and gas waste is delivered;

- (iii) the type and volume of oil and gas waste received by the hauler at the property where it was generated; and
- (iv) the type and volume of oil and gas waste transported and delivered by the hauler to the disposal system or commercial recycling facility.

(B) Such record shall be kept open for the inspection of the commission or its representatives.

(C) Such record shall be kept on file for a period of three years from the date of operation and recordation.

(g) Recordkeeping.

(1) Oil and gas waste. When oil and gas waste is hauled by vehicle from the lease, unit, or other oil or gas property where it is generated to an off-lease disposal or recycling facility, the person generating the oil and gas waste shall keep, for a period of three years from the date of generation, the following records:

- (A) identity of the property from which the oil and gas waste is hauled;
- (B) identity of the disposal system or recycling facility to which the oil and gas waste is delivered;
- (C) name and address of the hauler, and permit number (WHP number) if applicable; and
- (D) type and volume of oil and gas waste transported each day to disposal or recycling.

(2) Retention of run tickets. A person may comply with the requirements of paragraph (1) of this subsection by retaining run tickets or other billing information created by the oil and gas waste hauler, provided the run tickets or other billing information contain all the information required by paragraph (1) of this subsection.

(3) Examination and reporting. The person keeping any records required by this subsection shall make the records available for examination and copying by members and employees of the commission during reasonable working hours. Upon request of the commission, the person keeping the records shall file such records with the commission.

(h) Penalties. Violations of this section may subject a person to penalties and remedies specified in the Texas Natural Resources Code, Title 3, and any other statutes administered by the commission. The certificate of compliance for any oil, gas, or geothermal resource well may be revoked in the manner provided in §3.73 of this title (relating to Pipeline Connection; Cancellation of Certificate of Compliance; Severance) (Rule 73) or violation of this section.

(i) Coordination between the Railroad Commission of Texas and the Texas Commission on Environmental Quality or its successor agencies. The Railroad Commission and the Texas Commission on Environmental Quality both have adopted by rule a memorandum of understanding regarding the division of jurisdiction between the agencies over wastes that result from, or are related to, activities associated with the exploration, development, and production of oil, gas, or geothermal resources, and the refining of oil. The memorandum of understanding is adopted in §3.30 of this title (relating to Memorandum of Understanding between the Railroad Commission of Texas (RRC) and the Texas Commission on Environmental Quality (TCEQ)).

(j) Consistency with the Texas Coastal Management Program. The provisions of this subsection apply only to activities that occur in the coastal zone and that are subject to the CMP rules.

(1) Specific Policies.

(A) Disposal of Oil and Gas Waste in Pits. The following provisions apply to oil and gas waste disposal pits located in the coastal zone:

- (i) no commercial oil and gas waste disposal pit constructed after the effective date of this subsection shall be located in any CNRA; and
- (ii) all oil and gas waste disposal pits shall be designed to prevent releases of pollutants that adversely affect coastal waters or critical areas.

(B) Discharge of Oil and Gas Waste to Surface Waters. The following provisions apply to discharges of oil and gas waste that occur in the coastal zone:

- (i) no discharge of oil and gas waste to surface waters may cause a violation of the Texas Surface Water Quality Standards adopted by the Texas Commission on Environmental Quality or its successor agencies and codified at Title 30, Texas Administrative Code, Chapter 307;
- (ii) in determining whether any permit to discharge oil and gas waste that is comprised, in whole or in part, of produced water is consistent with the goals and policies of the CMP, the commission shall consider the effects of salinity from the discharge;
- (iii) to the greatest extent practicable, in the case of any oil and gas exploration, production, or development operation from which an oil and gas waste discharge commences after the effective date this subsection, the outfall for the discharge shall not be located where the discharge will adversely affect any critical area;
- (iv) in the case of any oil and gas exploration, production, or development operation with an oil and gas waste discharge permitted prior to the effective date of this subsection that adversely affects any critical area, the outfall for the discharge shall either:
  - (I) be relocated within two years after the effective date of this subsection, so that, to the greatest extent practicable, the discharge does not adversely affect any critical area; or
  - (II) the discharge shall be discontinued; and
- (v) the commission shall notify the Texas Commission on Environmental Quality or its successor agencies and the Texas Parks and Wildlife Department upon receipt of an application for a permit to discharge oil and gas waste that is comprised, in whole or in part, of produced waters to waters under tidal influence.

(C) Development in Critical Areas. The provisions of this subparagraph apply to issuance under §401 of the federal Clean Water Act, United States Code, Title 33, §1341, of certifications of compliance with applicable water quality requirements for federal

permits authorizing development affecting critical areas. Prior to issuing any such certification, the commission shall confirm that the requirements of Title 31, Texas Administrative Code, §501.14(h)(1)(A) - (G), have been satisfied. The commission shall coordinate its efforts under this subparagraph with those of other appropriate state and federal agencies.

(D) Dredging and Dredged Material Disposal and Placement. The provisions of this subparagraph apply to issuance under §401 of the federal Clean Water Act, United States Code, Title 33, §1341, of certifications of compliance with applicable water quality requirements for federal permits authorizing dredging and dredged material disposal and placement in the coastal zone. Prior to issuing any such certification, the commission shall confirm that the requirements of Title 31, Texas Administrative Code, §501.14(j), have been satisfied.

(2) Consistency Determinations. The provisions of this paragraph apply to issuance of determinations required under Title 31, Texas Administrative Code, §505.30 (Agency Consistency Determination), for the following actions listed in Title 31, Texas Administrative Code, §505.11(a)(3): permits to dispose of oil and gas waste in a pit; permits to discharge oil and gas wastes to surface waters; and certifications of compliance with applicable water quality requirements for federal permits for development in critical areas and dredging and dredged material disposal and placement in the coastal area.

(A) The commission shall issue consistency determinations under this paragraph as an element of the permitting process for permits to dispose of oil and gas waste in a pit and permits to discharge oil and gas waste to surface waters.

(B) Prior to issuance of a permit or certification covered by this paragraph, the commission shall determine if the proposed activity will have a direct and significant adverse effect on any CNRA identified in the provisions of paragraph (1) of this subsection that are applicable to such activity.

(i) If the commission determines that issuance of a permit or a certification covered by this paragraph would not result in direct and significant adverse effects to any CNRA identified in the provisions of paragraph (1) of this subsection that are applicable to the proposed activity, the commission shall issue a written determination of no direct and significant adverse effect which shall read as follows: "The Railroad Commission has reviewed this proposed action for consistency with the Coastal Management Program (CMP) goals and policies, and has found that the proposed action will not have a direct and significant adverse affect on any coastal natural resource area (CNRA) identified in the applicable policies."

(ii) If the commission determines that issuance of a permit or certification covered by this paragraph would result in direct and significant adverse affects to a CNRA identified in the provisions of paragraph (1) of this subsection that are applicable to the proposed activity, the commission shall determine whether the proposed activity would meet the applicable requirements of paragraph (1) of this subsection.

(I) If the commission determines that the proposed activity would meet the applicable requirements of paragraph (1) of this subsection, the

commission shall issue a written consistency determination which shall read as follows: "The Railroad Commission has reviewed this proposed action for consistency with the Texas Coastal Management Program (CMP) goals and policies, and has determined that the proposed action is consistent with the applicable CMP goals and policies."

(II) If the commission determines that the proposed activity would not meet the applicable requirements of paragraph (1) of this subsection, the commission shall not issue the permit or certification.

(3) Thresholds for Referral. Any commission action that is not identified in this paragraph shall be deemed not to exceed thresholds for referral for purposes of the CMP rules. Pursuant to Title 31, Texas Administrative Code, §505.32 (Requirements for Referral of an Individual Agency Action), the thresholds for referral of consistency determinations issued by the commission are as follows:

(A) for oil and gas waste disposal pits, any permit to construct a pit occupying five acres or more of any CNRA that has been mapped or that may be readily determined by a survey of the site;

(B) for discharges, any permit to discharge oil and gas waste consisting, in whole or in part, of produced waters into tidally influenced waters at a rate equal to or greater than 100,000 gallons per day;

(C) for certification of federal permits for development in critical areas:

(i) in the bays and estuaries between Pass Cavallo in Matagorda Bay and the border with the Republic of Mexico, any certification of a federal permit authorizing disturbance of:

(I) ten acres or more of submerged aquatic vegetation or tidal sand or mud flats; or

(II) five acres or more of any other critical area; and

(ii) in all areas within the coastal zone other than the bays and estuaries between Pass Cavallo in Matagorda Bay and the border with the Republic of Mexico, any certification of a federal permit authorizing disturbance of five acres or more of any critical area;

(D) for certification of federal permits for dredging and dredged material disposal or placement, certification of a permit authorizing removal of more than 10,000 cubic yards of dredged material from a critical area.

## 16 Texas Administrative Code §3.14. Plugging

### (a) Definitions and application to plug.

(1) The following words and terms, when used in this section, shall have the following meanings, unless the context clearly indicates otherwise:

- (A) Approved cementer--A cementing company, service company, or operator approved by the Commission or its delegate to mix and pump cement for the purpose of plugging a well in accordance with the provisions of this section. The term shall also apply to a cementing company, service company, or operator authorized by the Commission or its delegate to use an alternate material other than cement to plug a well.
- (B) Funnel viscosity--Viscosity as measured by the Marsh funnel, based on the number of seconds required for 1,000 cubic centimeters of fluid to flow through the funnel.
- (C) Groundwater conservation district--Any district or authority created under §52, Article III, or §59, Article XVI, Texas Constitution, that has the authority to regulate the spacing of water wells, the production from water wells, or both.
- (D) Operator designation form--A certificate of compliance and transportation authority or an application to drill, deepen, recomplete, plug back, or reenter that has been completed, signed, and filed with the Commission or its delegate.
- (E) Productive horizon--Any stratum known to contain oil, gas, or geothermal resources in producible quantities in the vicinity of an unplugged well.
- (F) Related piping--The surface piping and subsurface piping that is less than three feet beneath the ground surface between pieces of equipment located at any collection or treatment facility. Such piping would include piping between and among headers, manifolds, separators, storage tanks, gun barrels, heater treaters, dehydrators, and any other equipment located at a collection or treatment facility. The term is not intended to refer to lines, such as flowlines, gathering lines, and injection lines that lead up to and away from any such collection or treatment facility.
- (G) Reported production--Production of oil or gas, excluding production attributable to well tests, accurately reported to the Commission or its delegate on Form PR, Monthly Production Report.
- (H) Serve notice on the surface owner or resident--To hand deliver a written notice identifying the well or wells to be plugged and the projected date the well or wells will be plugged to the surface owner, or resident if the owner is absent, at least three days prior to the day of plugging or to mail the notice by first class mail, postage pre-paid, to the last known address of the surface owner or resident at least seven days prior to the day of plugging.
- (I) Usable quality water strata--All strata determined by the Groundwater Advisory Unit of the Oil and Gas Division to contain usable quality water.
- (J) Written notice--Notice actually received by the intended recipient in tangible or retrievable form, including notice set out on paper and hand-delivered, facsimile transmissions, and electronic mail transmissions.

(2) The operator shall give the Commission notice of its intention to plug any well or wells drilled for oil, gas, or geothermal resources or for any other purpose over which the Commission has jurisdiction, except those specifically addressed in §3.100(e)(1) of this title (relating to Seismic

Holes and Core Holes) (Statewide Rule 100), prior to plugging. The operator shall deliver or transmit the written notice to the district office on the appropriate form.

(3) The operator shall cause the notice of its intention to plug to be delivered to the district office at least five days prior to the beginning of plugging operations. The notice shall set out the proposed plugging procedure as well as the complete casing record. The operator shall not commence the work of plugging the well or wells until the proposed procedure has been approved by the district director or the director's delegate. The operator shall not initiate approved plugging operations before the date set out in the notification for the beginning of plugging operations unless authorized by the district director or the director's delegate. The operator shall notify the district office at least four hours before commencing plugging operations and proceed with the work as approved. The district director or the director's delegate may grant exceptions to the requirements of this paragraph concerning the timing of notices when a workover or drilling rig is already at work on location, and ready to commence plugging operations. Operations shall not be suspended prior to plugging the well unless the hole is cased and casing is cemented in place in compliance with Commission rules. The Commission's approval of a notice of intent to plug and abandon a well shall not relieve an operator of the requirement to comply with subsection (b)(2) of this section, nor does such approval constitute an extension of time to comply with subsection (b)(2) of this section.

(4) The surface owner and the operator may file an application to condition an abandoned well located on the surface owner's tract for usable quality water production operations. The application shall be made on Commission Form P-13, the Application of Landowner to Condition an Abandoned Well for Fresh Water Production.

(A) Standard for Commission Approval. Before the Commission will consider approval of an application:

- (i) the surface owner shall assume responsibility for plugging the well and obligate himself, his heirs, successors, and assignees to complete the plugging operations;
- (ii) the operator responsible for plugging the well shall place all cement plugs required by this rule up to the base of the usable quality water strata; and
- (iii) the surface owner shall submit:

(I) a signed statement attesting to the fact that:

- (-a-) there is no groundwater conservation district for the area in which the well is located; or
- (-b-) there is a groundwater conservation district for the area where the well is located, but the groundwater conservation district does not require that the well be permitted or registered; or

(-c-) the surface owner has registered the well with the groundwater conservation district for the area where the well is located; or

(II) a copy of the permit from the groundwater conservation district for the area where the well is located.

(B) The duty of the operator to properly plug ends only when:

(i) the operator has properly plugged the well in accordance with Commission requirements up to the base of the usable quality water stratum;

(ii) the surface owner has registered the well with, or has obtained a permit for the well from, the groundwater conservation district, if applicable; and

(iii) the Commission has approved the application of surface owner to condition an abandoned well for fresh water production.

(5) The operator of a well shall serve notice on the surface owner of the well site tract, or the resident if the owner is absent, before the scheduled date for beginning the plugging operations. A representative of the surface owner may be present to witness the plugging of the well. Plugging shall not be delayed because of the lack of actual notice to the surface owner or resident if the operator has served notice as required by this paragraph. The district director or the director's delegate may grant exceptions to the requirements of this paragraph concerning the timing of notices when a workover or drilling rig is already at work on location and ready to commence plugging operations.

(b) Commencement of plugging operations, extensions, and testing.

(1) The operator shall complete and file in the district office a duly verified plugging record, in duplicate, on the appropriate form within 30 days after plugging operations are completed. A cementing report made by the party cementing the well shall be attached to, or made a part of, the plugging report. If the well the operator is plugging is a dry hole, an electric log status report shall be filed with the plugging record.

(2) Plugging operations on each dry or inactive well shall be commenced within a period of one year after drilling or operations cease and shall proceed with due diligence until completed unless the Commission or its delegate approves a plugging extension under §3.15 of this title (relating to Surface Equipment Removal Requirements and Inactive Wells).

(3) The Commission may plug or replug any dry or inactive well as follows:

(A) After notice and hearing, if the well is causing or is likely to cause the pollution of surface or subsurface water or if oil, gas, or other formation fluid is leaking from the well, and:

(i) neither the operator nor any other entity responsible for plugging the well can be found; or

(ii) neither the operator nor any other entity responsible for plugging the well has assets with which to plug the well.

(B) Without a hearing if the well is a delinquent inactive well and:

- (i) the Commission has sent notice of its intention to plug the well as required by §89.043(c) of the Texas Natural Resources Code; and
- (ii) the operator did not request a hearing within the period (not less than 10 days after receipt) specified in the notice.

(C) Without notice or hearing, if:

- (i) the Commission has issued a final order requiring that the operator plug the well and the order has not been complied with; or
- (ii) the well poses an immediate threat of pollution of surface or subsurface waters or of injury to the public health and the operator has failed to timely remediate the problem.

(4) The Commission may seek reimbursement from the operator and any other entity responsible for plugging the well for state funds expended pursuant to paragraph (3) of this subsection.

(c) Designated operator responsible for proper plugging.

(1) The entity designated as the operator of a well specifically identified on the most recent Commission-approved operator designation form filed on or after September 1, 1997, is responsible for properly plugging the well in accordance with this section and all other applicable Commission rules and regulations concerning plugging of wells.

(2) As to any well for which the most recent Commission-approved operator designation form was filed prior to September 1, 1997, the entity designated as operator on that form is presumed to be the entity responsible for the physical operation and control of the well and to be the entity responsible for properly plugging the well in accordance with this section and all other applicable Commission rules and regulations concerning plugging of wells. The presumption of responsibility may be rebutted only at a hearing called for the purpose of determining plugging responsibility.

(d) General plugging requirements.

(1) Wells shall be plugged to insure that all formations bearing usable quality water, oil, gas, or geothermal resources are protected. All cementing operations during plugging shall be performed under the direct supervision of the operator or his authorized representative, who shall not be an employee of the service or cementing company hired to plug the well. Direct supervision means supervision at the well site during the plugging operations. The operator and the cementer are both responsible for complying with the general plugging requirements of this subsection and for plugging the well in conformity with the procedure set forth in the approved notice of intention to plug and abandon for the well being plugged. The operator and cementer may each be assessed administrative penalties for failure to comply with the general plugging

requirements of this subsection or for failure to plug the well in conformity with the approved notice of intention to plug and abandon the well.

(2) Cement plugs shall be set to isolate each productive horizon and usable quality water strata. Plugs shall be set as necessary to separate multiple usable quality water strata by placing the required plug at each depth as determined by the Groundwater Advisory Unit of the Oil and Gas Division. The operator shall verify the placement of the plug required at the base of the deepest usable quality water stratum by tagging with tubing or drill pipe or by an alternate method approved by the district director or the district director's delegate.

(3) Cement plugs shall be placed by the circulation or squeeze method through tubing or drill pipe. Cement plugs shall be placed by other methods only upon written request with the written approval of the district director or the director's delegate.

(4) All cement for plugging shall be an approved API oil well cement without volume extenders and shall be mixed in accordance with API standards. Slurry weights shall be reported on the cementing report. The district director or the director's delegate may require that specific cement compositions be used in special situations; for example, when high temperature, salt section, or highly corrosive sections are present. An operator shall request approval to use alternate materials, other than API oil well cement without volume extenders, to plug a well by filing with the director or the director's delegate a written request providing all pertinent information to support the use of the proposed alternate material and plugging method. The director or the director's delegate shall determine whether such a request warrants approval, after considering factors which include but are not limited to whether or not the well to be plugged was used as an injection or disposal well; the well's history; the well's current bottom hole pressure; the presence of highly pressurized formations intersected by the wellbore; the method by which the alternative material will be placed in the wellbore; and the compressive strength and other performance specifications of the alternative material to be used. The director or the director's delegate shall approve such a request only if the proposed alternate material and plugging method will ensure that the well does not pose a potential threat of harm to natural resources.

(5) Operators shall use only cementers approved by the director or the director's delegate, except when plugging is conducted in accordance with subparagraph (B)(ii) of this paragraph or paragraph (6) of this subsection. Cementing companies, service companies, or operators may apply for designation as approved cementers. Approval will be granted on a showing by the applicant of the ability to mix and pump cement or other alternate materials as approved by the director or the director's delegate in compliance with this rule. An approved cementer is authorized to conduct plugging operations in accordance with Commission rules in each Commission district.

(A) A cementing company, service company, or operator seeking designation as an approved cementer shall file a request in writing with the district director of the district in which it proposes to conduct its initial plugging operations. The request shall contain the following information:

(i) the name of the organization as shown on its most recent approved organizational report;

- (ii) a list of qualifications including personnel who will supervise mixing and pumping operations;
- (iii) length of time the organization has been in the business of cementing oil and gas wells;
- (iv) an inventory of the type of equipment to be used to mix and pump cement or other alternate materials as approved by the director or the director's delegate; and
- (v) a statement certifying that the organization will comply with all Commission rules.

(B) No request for designation as an approved cementer will be approved until after the district director or the director's delegate has:

- (i) inspected all equipment to be used for mixing and pumping cement or other alternate materials as approved by the director or the director's delegate; and
- (ii) witnessed at least one plugging operation to determine if the cementing company, service company, or operator can properly mix and pump cement or other alternate materials as approved by the director or the director's delegate according to the specifications required by this rule.

(C) The district director or the director's delegate shall file a letter with the director or the director's delegate recommending that the application to be designated as an approved cementer be approved or denied. If the district director or the director's delegate does not recommend approval, or the director or the director's delegate denies the application, the applicant may request a hearing on its application.

(D) Designation as an approved cementer may be suspended or revoked for violations of Commission rules. The designation may be revoked or suspended administratively by the director or the director's delegate for violations of Commission rules if:

- (i) the cementer has been given written notice by personal service or by registered or certified mail informing the cementer of the proposed action, the facts or conduct alleged to warrant the proposed action, and of its right to request a hearing within 10 days to demonstrate compliance with Commission rules and all requirements for retention of designation as an approved cementer; and
- (ii) the cementer did not file a written request for a hearing within 10 days of receipt of the notice.

(6) An operator may request administrative authority to plug its own wells without being an approved cementer. An operator seeking such authority shall file a written request with the district director and demonstrate its ability to mix and pump cement or other alternate materials as approved by the director or the director's delegate in compliance with this subsection. The district director or the director's delegate shall determine whether such a request warrants approval. If the district director or the director's delegate refuses to administratively approve this request, the operator may request a hearing on its request.

(7) The district director or the director's delegate may require additional cement plugs to cover and contain any productive horizon or to separate any water stratum from any other water stratum if the water qualities or hydrostatic pressures differ sufficiently to justify separation. The tagging and/or pressure testing of any such plugs, or any other plugs, and respotting may be required if necessary to ensure that the well does not pose a potential threat of harm to natural resources.

(8) For onshore or inland wells, a 10-foot cement plug shall be placed in the top of the well, and casing shall be cut off three feet below the ground surface.

(9) Mud-laden fluid of at least 9-1/2 pounds per gallon with a minimum funnel viscosity of 40 seconds shall be placed in all portions of the well not filled with cement or other alternate material as approved by the director or the director's delegate. The hole shall be in static condition at the time the cement plugs are placed. The district director or the director's delegate may grant exceptions to the requirements of this paragraph if a deviation from the prescribed minimums for fluid weight or viscosity will insure that the well does not pose a potential threat of harm to natural resources. An operator shall request approval to use alternate fluid other than mud-laden fluid by filing with the district director a written request providing all pertinent information to support the use of the proposed alternate fluid. The district director or the director's delegate shall determine whether such a request warrants approval, and shall approve such a request only if the proposed alternate fluid will insure that the well does not pose a potential threat of harm to natural resources.

(10) Non-drillable material that would hamper or prevent reentry of a well shall not be placed in any wellbore during plugging operations, except in the case of a well plugged and abandoned under the provisions of §3.35 or §4.614(b) of this title (relating to Procedures for Identification and Control of Wellbores in Which Certain Logging Tools Have Been Abandoned (Statewide Rule 35); and Authorized Disposal Methods, respectively). Pipe and unretrievable junk shall not be cemented in the hole during plugging operations without prior approval by the district director or the director's delegate.

(11) All cement plugs, except the top plug, shall have sufficient slurry volume to fill 100 feet of hole, plus 10% for each 1,000 feet of depth from the ground surface to the bottom of the plug.

(12) The operator shall fill the rathole, mouse hole, and cellar, and shall empty all tanks, vessels, related piping and flowlines that will not be actively used in the continuing operation of the lease within 120 days after plugging work is completed. Within the same 120 day period, the operator shall remove all such tanks, vessels, and related piping, remove all loose junk and trash from the location, and contour the location to discourage pooling of surface water at or around the facility site. The operator shall close all pits in accordance with the provisions of §3.8 of this title (relating to Water Protection (Statewide Rule 8)). The district director or the director's delegate may grant a reasonable extension of time of not more than an additional 120 days for the removal of tanks, vessels and related piping.

(e) Plugging requirements for wells with surface casing.

(1) When insufficient surface casing is set to protect all usable quality water strata and such usable quality water strata are exposed to the wellbore when production or intermediate casing is pulled from the well or as a result of such casing not being run, a cement plug shall be a minimum of 100 feet in length and shall extend at least 50 feet above and 50 feet below the base of the deepest usable quality water stratum. This plug shall be evidenced by tagging with

tubing or drill pipe. The plug shall be respotted if it has not been properly placed. In addition, a cement plug shall be set across the shoe of the surface casing. This plug shall be a minimum of 100 feet in length and shall extend at least 50 feet above and below the shoe.

(2) When sufficient surface casing has been set to protect all usable quality water strata, a cement plug shall be placed across the shoe of the surface casing. This plug shall be a minimum of 100 feet in length and shall extend at least 50 feet above the shoe and at least 50 feet below the shoe.

(3) If surface casing has been set deeper than 200 feet below the base of the deepest usable quality water stratum, an additional cement plug shall be placed inside the surface casing across the base of the deepest usable quality water stratum. This plug shall be a minimum of 100 feet in length and shall extend at least 50 feet below and 50 feet above the base of the deepest usable quality water stratum.

(4) Plugs shall be set as necessary to separate multiple usable quality water strata by placing the required plug at each depth as determined by the Groundwater Advisory Unit of the Oil and Gas Division.

(5) An operator may not remove, cause to be removed, or allow to be removed surface casing from a well at abandonment. This prohibition applies to wells drilled by cable tool and rotary rigs alike.

(f) Plugging requirements for wells with intermediate casing.

(1) For wells in which the intermediate casing has been cemented through all usable quality water strata and all productive horizons, a cement plug meeting the requirements of subsection (d)(11) of this section shall be placed inside the casing and centered opposite the base of the deepest usable quality water stratum, but extend no less than 50 feet above and below the base of the deepest usable quality water stratum.

(2) For wells in which intermediate casing is not cemented through all usable quality water strata and all productive horizons, and if the casing will not be pulled, the intermediate casing shall be perforated at the required depths to place cement outside of the casing by squeeze cementing through casing perforations.

(3) Additionally, plugs shall be set as necessary to separate multiple usable quality water strata by placing the required plug at each depth as determined by the Groundwater Advisory Unit of the Oil and Gas Division.

(g) Plugging requirements for wells with production casing.

(1) For wells in which the production casing has been cemented through all usable quality water strata and all productive horizons, a cement plug meeting the requirements of subsection (d)(11) of this section shall be placed inside the casing and centered opposite the base of the deepest usable quality water stratum and across any multi-stage cementing tool. This plug shall be a minimum of 100 feet in length and shall extend at least 50 feet below and 50 feet above the base of the deepest usable quality water stratum.

(2) For wells in which the production casing has not been cemented through all usable quality water strata and all productive horizons and if the casing will not be pulled, the production

casing shall be perforated at the required depths to place cement outside of the casing by squeeze cementing through casing perforations.

(3) The district director or the director's delegate may approve a cast iron bridge plug to be placed immediately above each perforated interval, provided at least 20 feet of cement is placed on top of each bridge plug. A bridge plug shall not be set in any well at a depth where the pressure or temperature exceeds the ratings recommended by the bridge plug manufacturer.

(4) Additionally, plugs shall be set as necessary to separate multiple usable quality water strata by placing the required plug at each depth as determined by the Groundwater Advisory Unit of the Oil and Gas Division.

(h) Plugging requirements for well with screen or liner.

(1) If practical, the screen or liner shall be removed from the well.

(2) If the screen or liner is not removed, a cement plug in accordance with subsection (d)(11) of this section shall be placed at the top of the screen or liner.

(i) Plugging requirements for wells without production casing and open-hole completions.

(1) Any productive horizon or any formation in which a pressure or formation water problem is known to exist shall be isolated by cement plugs centered at the top and bottom of the formation. Each cement plug shall have sufficient slurry volume to fill a calculated height as specified in subsection (d)(11) of this section.

(2) If the gross thickness of any such formation is less than 100 feet, the tubing or drill pipe shall be suspended 50 feet below the base of the formation. Sufficient slurry volume shall be pumped to fill the calculated height from the bottom of the tubing or drill pipe up to a point at least 50 feet above the top of the formation, plus 10% for each 1,000 feet of depth from the ground surface to the bottom of the plug.

(j) The district director or the director's delegate shall review and approve the notification of intention to plug in a manner so as to accomplish the purposes of this section. The district director or the director's delegate may approve, modify, or reject the operator's notification of intention to plug. If the proposal is modified or rejected, the operator may request a review by the director or the director's delegate. If the proposal is not administratively approved, the operator may request a hearing on the matter. After hearing, the examiner shall recommend final action by the Commission.

(k) Plugging horizontal drainhole wells. All plugs in horizontal drainhole wells shall be set in accordance with subsection (d)(11) of this section. The productive horizon isolation plug shall be set from a depth 50 feet below the top of the productive horizon to a depth either 50 feet above the top of the productive horizon, or 50 feet above the production casing shoe if the production casing is set above the top of the productive horizon. If the production casing shoe is set below the top of the productive horizon, then the productive horizon isolation plug shall be set from a depth 50 feet below the production casing shoe to a depth that is 50 feet above the top of the productive horizon. In accordance with subsection (d)(7) of this section, the Commission or its delegate may require additional plugs.

## 16 Texas Administrative Code §3.91 Cleanup of Soil Contaminated by a Crude Oil Spill

(a) Terms. The following words and terms, when used in this section, shall have the following meanings, unless the context clearly indicates otherwise.

- (1) Free oil--The crude oil that has not been absorbed by the soil and is accessible for removal.
- (2) Sensitive areas--These areas are defined by the presence of factors, whether one or more, that make an area vulnerable to pollution from crude oil spills. Factors that are characteristic of sensitive areas include the presence of shallow groundwater or pathways for communication with deeper groundwater; proximity to surface water, including lakes, rivers, streams, dry or flowing creeks, irrigation canals, stock tanks, and wetlands; proximity to natural wildlife refuges or parks; or proximity to commercial or residential areas.
- (3) Hydrocarbon condensate--The light hydrocarbon liquids produced in association with natural gas.

(b) Scope. These cleanup standards and procedures apply to the cleanup of soil in non-sensitive areas contaminated by crude oil spills from activities associated with the exploration, development, and production, including transportation, of oil or gas or geothermal resources as defined in §3.8(a)(30) of this title (relating to Water Protection). For the purposes of this section, crude oil does not include hydrocarbon condensate. These standards and procedures do not apply to hydrocarbon condensate spills, crude oil spills in sensitive areas, or crude oil spills that occurred prior to the effective date of this section. Cleanup requirements for hydrocarbon condensate spills and crude oil spills in sensitive areas will be determined on a case-by-case basis. Cleanup requirements for crude oil contamination that occurred wholly or partially prior to the effective date of this section will also be determined on a case-by-case basis. Where cleanup requirements are to be determined on a case-by-case basis, the operator must consult with the appropriate district office on proper cleanup standards and methods, reporting requirements, or other special procedures.

(c) Requirements for cleanup.

- (1) Removal of free oil. To minimize the depth of oil penetration, all free oil must be removed immediately for reclamation or disposal.
- (2) Delineation. Once all free oil has been removed, the area of contamination must be immediately delineated, both vertically and horizontally. For purposes of this paragraph, the area of contamination means the affected area with more than 1.0% by weight total petroleum hydrocarbons.
- (3) Excavation. At a minimum, all soil containing over 1.0% by weight total petroleum hydrocarbons must be brought to the surface for disposal or remediation.
- (4) Prevention of stormwater contamination. To prevent stormwater contamination, soil excavated from the spill site containing over 5.0% by weight total petroleum hydrocarbons must immediately be:
  - (A) mixed in place to 5.0% by weight or less total petroleum hydrocarbons; or
  - (B) removed to an approved disposal site; or

(C) removed to a secure interim storage location for future remediation or disposal. The secure interim storage location may be on site or off site. The storage location must be designed to prevent pollution from contaminated stormwater runoff. Placing oily soil on plastic and covering it with plastic is one acceptable means to prevent stormwater contamination; however, other methods may be used if adequate to prevent pollution from stormwater runoff.

(d) Remediation of soil.

(1) Final cleanup level. A final cleanup level of 1.0% by weight total petroleum hydrocarbons must be achieved as soon as technically feasible, but not later than one year after the spill incident. The operator may select any technically sound method that achieves the final result.

(2) Requirements for bioremediation. If on-site bioremediation or enhanced bioremediation is chosen as the remediation method, the soil to be bioremediated must be mixed with ambient or other soil to achieve a uniform mixture that is no more than 18 inches in depth and that contains no more than 5.0% by weight total petroleum hydrocarbons.

(e) Reporting requirements.

(1) Crude oil spills over five barrels. For each spill exceeding five barrels of crude oil, the responsible operator must comply with the notification and reporting requirements of §3.20 of this title (relating to Notification of Fire Breaks, Leaks, or Blow-outs) and submit a report on a Form H-8 to the appropriate district office. The following information must be included:

(A) area (square feet), maximum depth (feet), and volume (cubic yards) of soil contaminated with greater than 1.0% by weight total petroleum hydrocarbons;

(B) a signed statement that all soil containing over 1.0% by weight total petroleum hydrocarbons was brought to the surface for remediation or disposal;

(C) a signed statement that all soil containing over 5.0% by weight total petroleum hydrocarbons has been mixed in place to 5.0% by weight or less total petroleum hydrocarbons or has been removed to an approved disposal site or to a secure interim storage location;

(D) a detailed description of the disposal or remediation method used or planned to be used for cleanup of the site;

(E) the estimated date of completion of site cleanup.

(2) Crude oil spills over 25 barrels. For each spill exceeding 25 barrels of crude oil, in addition to the report required in paragraph (1) of this subsection, the operator must submit to the appropriate district office a final report upon completion of the cleanup of the site. Analyses of samples representative of the spill site must be submitted to verify that the final cleanup concentration has been achieved.

(3) Crude oil spills of five barrels or less. Spills into the soil of five barrels or less of crude oil must be remediated to these standards, but are not required to be reported to the commission. All spills of crude oil into water must be reported to the commission.

(f) Alternatives. Alternatives to the standards and procedures of this section may be approved by the commission for good cause, such as new technology, if the operator has demonstrated to the commission's satisfaction that the alternatives provide equal or greater protection of the environment. A proposed alternative must be submitted in writing and approved by the commission.

## Work Plan Attachment 3

### Well Plugging Prioritization Methodology

The Railroad Commission uses a priority methodology to rank wells for plugging to ensure that those wells posing the greatest threat to public safety and the environment are plugged first. The priority system includes four factors relating to the threat a wellbore poses to public safety and the environment:

1. Well Completion;
2. Wellbore Conditions;
3. Well Location with respect to sensitive areas; and
4. Unique Environmental, Safety, or Economic Concern.

Table 1 lists the factors used in this prioritization system. The sum of all factors provides a total weight, which determines a well's plugging priority. Wells receive a priority of 1, 2H, 2, 3, or 4, where 1 is the highest priority. The priority system assigns leaking wells the highest priority (an automatic priority 1) and assigns an automatic priority 2 if the well fails a fluid level test.

*Table 1: Well Plugging Priority System*

FACTOR		Weight
<b>1</b>	<b>Well Completion</b>	
A	Unknown (no well records)	15
B	No surface casing or set above base of deepest usable quality water	10
C	Additional casing string not adequately cemented to isolate usable quality water	5
D	Injection or Disposal Well	10
E	Well penetrates salt/corrosive water bearing formation or abnormally pressured formation	5
F	Well in H2S Field	5
G	Age: Well drilled $\geq$ 25 years ago	5
<b>Total: (40 points max)</b>		
<b>2</b>	<b>Wellbore Conditions</b>	
A	Well is pressured up at the surface (tubing or prod casing)	10
B	Bradenhead pressure exists *	5
<b>Auto 2H if UQW not protected and fluid at BH is not UQW</b>		
C	Measured fluid level	
D	Fluid level at or above the base of deepest usable quality water.	50
E	Fluid level less than 250' below base of deepest usable quality water (NA if 2D applies)	15
F	MIT Failure	5
G	H-15 (MIT) never performed or test $>$ 5 years old (NA if F applies)	3
H	Inadequate wellhead control/integrity	5
<b>Total: (75 points max)</b>		
<b>3</b>	<b>Well location with respect to sensitive areas:</b>	
A	H2S well with Public area ROE** <b>Automatic Priority 2H</b>	
B	In Marine Environment	10
C	Within 100' or river, lake, creek, or domestic use fresh water well (NA if B applies)	5
D	Between 100' and 1/4 mile of river, lake, creek, or domestic use fresh water well (NA if C applies)	3
E	Located within agricultural area.	2
F	Well located in known sensitive wildlife area.	3
G	Well located within city or town site limits.	10
<b>Total (20 points max)</b>		

<b>4 Unique environmental, Safety, or Economic Concern</b>		
<b>A</b>	Adjacent to active water flood or disposal well at or above completion interval.	5
<b>B</b>	Logistics (poor roads, encroaching public, etc.)	5
<b>C</b>	Well contains junk.	5
<b>D</b>	P-5 Delinquent > 5 years	5
<b>E</b>	Other (attach explanation)	1-20
<b>Total: (20 points max)</b>		

**Total Weight****Priority 1 = Leaking Well [ based upon definition]****Priority 2H = Higher Risk well [based on definition and/or total weight of 75+]****Priority 2 = Total Weight of 50-75****Priority 3 = Total Weight of 25-49****Priority 4 = Total Weight < 25**

\*BH pressure is sustained.

\*\*2H if public areas could be impacted based on 16 Texas Administrative Code §3.36 [Statewide Rule 36] definition.

Undetected/continuous leak possible.

**RRC Orphaned Well Population - August 31, 2023**

## CERTIFICATION REGARDING LOBBYING

### Certification for Contracts, Grants, Loans, and Cooperative Agreements

The undersigned certifies, to the best of his or her knowledge and belief, that:

(1) No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of an agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

(2) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure of Lobbying Activities," in accordance with its instructions.

(3) The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly. This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than \$10,000 and not more than \$100,000 for each such failure.

### Statement for Loan Guarantees and Loan Insurance

The undersigned states, to the best of his or her knowledge and belief, that:

If any funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this commitment providing for the United States to insure or guarantee a loan, the undersigned shall complete and submit Standard Form-LLL, "Disclosure of Lobbying Activities," in accordance with its instructions. Submission of this statement is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required statement shall be subject to a civil penalty of not less than \$10,000 and not more than \$100,000 for each such failure.

## **ATTACHMENT A**

### **State Certification**

#### **Orphaned Well Site Plugging, Remediation, And Restoration Formula Grant**

Consistent with Sections 40601(c)(4)(A)(iii) and 40601(c)(4)(B)(iii) of the Infrastructure Investment and Jobs Act (aka Bipartisan Infrastructure Law), the State or Commonwealth of Railroad Commission of Texas certifies that:

1. Any financial assurance instruments available to cover plugging, remediation, or reclamation costs will be used by the State;<sup>18</sup> and
2. The State acknowledges the Davis-Bacon Act requirements for the award or project and confirms that all laborers and mechanics performing construction, alteration, or repair work on projects in excess of \$2,000 funded directly by or assisted in whole or in part by funding under the award are paid or will be paid wages at rates not less than those prevailing on projects of a character similar in the locality as determined by the Secretary of Labor in accordance with Subchapter IV of Chapter 31 of Title 40, United States Code.

**General Texas State Salary Guidance:** The Texas State Auditor's Office regulates the job classifications and descriptions. See the SAO's website for job descriptions - <https://hr.sao.texas.gov/CompensationSystem/JobDescriptions>. The State Salary Schedule is set by the Texas Legislature in Article IX (Pages IX-1 to IX-21) of the Texas General Appropriations Act (GAA) for state fiscal years 2024 and 2025 - [https://www.legis.state.tx.us/2024-25/Bills/88/Conference\\_Bills/Conf\\_CCR\\_GAB\\_88R.pdf](https://www.legis.state.tx.us/2024-25/Bills/88/Conference_Bills/Conf_CCR_GAB_88R.pdf). The GAA includes 5% statewide salary increases for fiscal years 2024 and 2025 for all state employees effective September 1 of each fiscal year. These salary increases are included in the salary amounts in the table above. The annual salary amounts in the job descriptions below are the expected salaries for fiscal year 2024.

### Field Staff

**Engineering Specialist II (40 positions- Well Plugging Inspectors)** Inspectors will spend 100 percent of their time inspecting, preparing, witnessing, and documenting well plugging activities in the field. These positions annual salary is \$60,000 and will be covered for the 12 to 15 months of the Phase I Formula Grant period. The filled positions will be covered from December 1, 2023 to February 28, 2025. The vacant positions will be covered from March 1, 2024 to February 28, 2025. These positions will continue for the duration of the Formula Grant and be paid with Phase II funds starting March 1, 2025. As of August 31, 2023, RRC has 16 Well Plugging Inspector positions from the Initial Grant.

**Engineering Specialist II (3 positions- Site Remediation Inspectors)** Inspectors will spend 100 percent of their time inspecting, preparing, witnessing, and documenting site cleanup activities in the field. These positions annual salary is \$60,000 and will be covered for the 12 months of the Phase I Formula Grant period. These positions are currently vacant and the grant funding will be cover from March 1, 2024 to February 28, 2025. These positions will continue for the duration of the Formula Grant and be paid with Phase II funds starting March 1, 2025.

**Administrative Assistant III (10 positions across district offices)** will spend 100 percent of their time supporting well plugging and site cleanup activities by assisting the coordination of administrative work. The administrative work includes communicating with the landowners and contractors on the scheduling of the work performed at the well site, review and verify accuracy of contractor invoices, handle the sale of salvage equipment for the district, and assist with the preparation of plugging documentation. This position's annual salary is \$43,440 and will be covered for the 13 months Phase I Formula Grant period. These positions are currently vacant and the grant funding will be cover from March 1, 2024 to March 31, 2025. These positions will continue for the duration of the Formula Grant and be paid with Phase II funds starting April 1, 2025.

### Austin Headquarters Staff

**Engineering Specialist II (1 position)** will spend 100 percent of their time reviewing well plugging procedures, reviewing and approving well plugging recommendations and invoices for payment, and coordinating well plugging schedules with district offices. This position's annual salary is \$60,000 and will be covered for the 16 months of the Phase I Formula Grant period. The positions currently filled and the grant funding will be cover from December 1, 2023 to March 31, 2025. This position will continue for the duration of the Formula Grant and be paid with Phase II funds starting April 1, 2025.

**Administrative Assistant III (1 position)** will spend 100 percent of their time supporting well plugging activities by processing recommendations and invoices for payment and posting data to various tracking systems. This position's annual salary is \$43,440 and will be covered for the 16 months of the Phase I Formula Grant period. The positions currently filled and the grant funding will be cover from December 1, 2023 to March 31, 2025. This position will continue for the duration of the Formula Grant and be paid with Phase II funds starting April 1, 2025.

**Project Manager V (1 position)** will spend 100 percent of their time ensuring that grant funded well plugging activities comply with IIJA grant reporting requirements, as well as all relevant federal statutes and regulations such as Davis Bacon Act and 2 CFR 200. This position will manage the grant budget, submit formal budget amendments, and quarterly reports. This position's annual salary is \$132,300 and will be covered for the 16 months of the Phase I Formula Grant period. The positions currently filled and the grant funding will be cover from December 1, 2023 to March 31, 2025. This position will continue for the duration of the Formula Grant and be paid with Phase II funds starting April 1, 2025.

**Project Manager IV (1 position)** will manage the Austin Headquarters State Managed Plugging Program's technical staff with 50% of their time devoted to the IIJA Phase I Formula Grant. This position is responsible for overseeing the technical aspects of the well plugging including prioritization and Justice40 Initiative, coordination with the RRC district's plugging plans, and the technical aspects of the Quarterly Reports. This position's annual salary is \$108,000 and half of the salary will be covered for the 13 months of the Phase I Formula Grant period and half with state funds. This position is new and currently vacant filled and the grant funding will be cover from March 1, 2024 to March 31, 2025. This position will continue for the duration of the Formula Grant and be paid with Phase II funds starting April 1, 2025.

## Detailed Budget Justification

### b. Fringe Benefits

Labor Type	Fiscal Year 2024			Fiscal Year 2025			Fiscal Year 2026			Fiscal Year 2027			Fiscal Year 2028			Total Project
	Personnel	Rate	Total	Personnel	Rate	Total	Personnel	Rate	Total	Personnel	Rate	Total	Personnel	Rate	Total	
Engineering Specialist II (41)	\$ 1,485,000	31.83%	\$ 472,676	\$ 1,296,750	31.83%	\$ 412,756			\$ -			\$ -			\$ -	\$ 885,432
Engineering Specialist II (3)	\$ 90,000	31.83%	\$ 28,647	\$ 94,500	31.83%	\$ 30,079			\$ -			\$ -			\$ -	\$ 58,726
Administrative Assistant III (11)	\$ 249,780	31.83%	\$ 79,505	\$ 292,677	31.83%	\$ 93,159			\$ -			\$ -			\$ -	\$ 172,664
Project Manager V (1)	\$ 99,225	31.83%	\$ 31,583	\$ 81,034	31.83%	\$ 25,793			\$ -			\$ -			\$ -	\$ 57,376
Project Manager IV (.5)	\$ 27,000	31.83%	\$ 8,594	\$ 33,075	31.83%	\$ 10,528			\$ -			\$ -			\$ -	\$ 19,122
<b>Total:</b>	<b>\$ 1,951,005</b>		<b>\$ 621,005</b>	<b>\$ 1,798,036</b>		<b>\$ 572,315</b>	<b>\$ -</b>		<b>\$ -</b>	<b>\$ -</b>		<b>\$ -</b>	<b>\$ -</b>		<b>\$ -</b>	<b>\$ 1,193,320</b>

A federally approved fringe benefit rate agreement, or a proposed rate supported and agreed upon by the cognizant agency for estimating purposes is required at the time of award negotiation if reimbursement for fringe benefits is requested. Please check (X) one of the options below and provide the requested information if not previously submitted.

A fringe benefit rate has been negotiated with, or approved by, a federal government agency. A copy of the latest rate agreement is/was included with the project application.\*

There is not a current federally approved rate agreement negotiated and available.\*\*

\*Unless the organization has submitted an indirect rate proposal which encompasses the fringe pool of costs, please provide the organization's benefit package and/or a list of the components/elements that comprise the fringe pool and the cost or percentage of each component/element allocated to the labor costs.

The fringe rate of 31.83% is composed of five components.

- Federal Payroll Taxes (FICA) - Employer portion is 7.65 percent comprised 6.2 percent for Social Security and 1.45 percent for Medicare.
- State Retirement - State contribution to the State of Texas Employees Retirement System (ERS) is 9.50 percent established by Texas Government Code Section 815.403.
- Health Insurance - State paid health insurance premium estimated rate is set by the Texas Legislative Budget Board at 13.18 percent for 2024-25. The actual health insurance premium cost is a fixed amount that depends on the type of health insurance coverage the employee elects.
- Payroll Health Insurance Contribution - Texas House Bill 1, Regular Session, 88th Legislature, Article IX, Section 17.03 requires each state agency to contribute an amount equal to 1 percent of the total base wages and salaries for each benefits-eligible employee to the Employees Retirement System's Group Benefits Program.
- Payroll Retirement Contribution - Texas Government Code Section 815.4035 requires each state agency to contribute an amount equal to 0.5 percent of the total base wages and salaries for each eligible employee to the Employees Retirement System's Retirement Program.

**Note:** The 31.83% fringe benefits rate is the estimate for budgeting purposes, RRC will charge the actual fringe benefits expenditures to the grant.

## Detailed Budget Justification

### C. Travel

Dates	Purpose of Travel	Depart From	Destination	No of Miles if Driving (Roundtrip )	No. of Days	No. of Travelers	Mileage if POV	Lodging per Traveler	Flight per Traveler	Vehicle per Traveler	Per Diem Per Traveler	Cost per Trip	Basis for Estimating Costs	
	<b>Domestic Travel</b>				<b>Fiscal Year 2024</b>									
	Well Plugging - Travel for Inspectors to the well site. Gas & Vehicle Maintenance (Est. \$0.28/mile for 40 vehicles @ 1,900 miles monthly)	Statewide	Statewide	547,200								\$153,216	FY 2023 Cost per mile rate for Initial Grant Vehicles	
	Site Remediation - Travel for Inspectors to the well site - Gas & Vehicle Maintenance (Est. \$0.28/mile for 3 vehicles @ 1,900 miles monthly)	Statewide	Statewide	34,200								\$9,576	FY 2023 Cost per mile rate for Initial Grant Vehicles	
	Administrative Compliance Site Visits - Locations to be determined based on Contractors awarded contracts during solicitation	Statewide	Statewide		28	2	\$3,472			\$736	\$1,792	\$12,000	Current GSA rates for Texas	
	<b>Fiscal Year 2024 Total</b>											<b>\$174,792</b>		
	<b>Domestic Travel</b>				<b>Fiscal Year 2025</b>									
	Well Plugging - Gas & Vehicle Maintenance (Est. \$0.28/mile for 40 vehicles @ 1,900 miles monthly)	Statewide	Statewide	456,000								\$127,680	FY 2023 Cost per mile rate for Initial Grant Vehicles	
	Site Remediation - Gas & Vehicle Maintenance (Est. \$0.28/mile for 3 vehicles @ 1,900 miles monthly)	Statewide	Statewide	34,200								\$9,576	FY 2023 Cost per mile rate for Initial Grant Vehicles	
	Administrative Compliance Site Visits - Locations to be determined based on Contractors awarded contracts during solicitation	Statewide	Statewide		7	2	\$868			\$184	\$448	\$3,000	Current GSA rates for Texas	
												\$0		
	<b>Fiscal Year 2025 Total</b>											<b>\$140,256</b>		
	<b>Domestic Travel</b>				<b>Fiscal Year 2026</b>									
												\$0		
	<b>Fiscal Year 2026 Total</b>											<b>\$0</b>		
	<b>Domestic Travel</b>				<b>Fiscal Year 2027</b>									
												\$0		
	<b>Fiscal Year 2027 Total</b>											<b>\$0</b>		
	<b>Domestic Travel</b>				<b>Fiscal Year 2028</b>									
												\$0		
	<b>Fiscal Year 2028 Total</b>											<b>\$0</b>		
	<b>PROJECT TOTAL</b>											<b>\$315,048</b>		

For each trip listed, please provide detail as to purpose of trip and how it related to project or program.

Gas and Vehicle Maintenance - RRC will have 43 Inspectors at oil and gas well sites around the state monitoring the work performed by RRC contractors. The miles per month is based on the average miles per month for the Initial Grant Inspectors in FY 2023. The cost per mile is based on the fuel and routine maintenance costs incurred for the trucks used by the Initial Grant Inspectors in FY 2023. There will be additional travel across the state to meet with contractors to review systems, policies, and procedures that help ensure compliance with federal regulations such as the Davis-Bacon Act. The destination of this travel will depend on the physical locations of the headquarters of the new contractors from the RFQ solicitations. These new contracts are expected to be in place March 2024 and the travel will occur in the following months.

## Detailed Budget Justification

### d. Equipment

Workplan Activity	Equipment Item	Qty	Unit Cost	Total Cost	Basis of Cost	Justification of need
<b>Fiscal Year 2024</b>						
Well Plugging	Ford F150 4x4 Trucks	29	\$45,057	\$1,306,653	State Contract Pricing	Trucks for new Well Plugging Inspectors to reach oil and gas well sites to monitor the work of the contractors.
Site Cleanup	Ford F150 4x4 Trucks	3	\$45,057	\$135,171	State Contract Pricing	Trucks for new Site Remediation Cleanup Inspectors to reach oil and gas well sites to monitor the work of the contractors.
Well Plugging	Teledyne FLIR Gx620 24° cameras	10	\$111,150	\$1,111,500	Vendor Quote - Formal Competitive Solicitation Required	Equipment to detect methane and measure quantity if necessary.
				\$0		
<b>Fiscal Year 2024 Total</b>				<b>\$2,553,324</b>		
<b>Fiscal Year 2025</b>						
				\$0		
<b>Fiscal Year 2025 Total</b>				<b>\$0</b>		
<b>Fiscal Year 2026</b>						
				\$0		
<b>Fiscal Year 2026 Total</b>				<b>\$0</b>		
<b>Fiscal Year 2027</b>						
				\$0		
<b>Fiscal Year 2027 Total</b>				<b>\$0</b>		
<b>Fiscal Year 2028</b>						
				\$0		
<b>Fiscal Year 2028 Total</b>				<b>\$0</b>		
<b>PROJECT TOTAL</b>				<b>\$2,553,324</b>		

**Additional Explanation (as needed):** RRC purchased 11 Trucks in 2023 with the Initial Well Plugging Grant and these trucks will be used by Inspectors for this grant in addition to the new ones listed above in 2024. Trucks will be purchased off of the Texas Comptroller statewide TXSmartBuy contract.

Texas statute requires formal competitive solicitation for the procurement FLIR cameras due to the expected cost. The actual cost will depend on bids received from vendors.

RRC is required to purchase vehicles under State of Texas contracts, which are managed by the State of Texas Comptroller of Public Accounts under the TXSmartBuy program, available here: <https://www.txsmartbuy.com/>. Off road capable 4x4 trucks are not available with a lease option under any available contracts. Leasing trucks is not practicable or possible given the high mileage and extensive wear and tear from off road usage.

## Detailed Budget Justification

### e. Supplies

Workplan Activity	General Category of Supplies	Qty	Unit Cost	Total Cost	Basis of Cost	Justification of need
<b>Fiscal Year 2024</b>						
All Activities	Computers	32	\$1,356.00	\$43,392	State Contract	Computers for new Formula Grant positions to perform various work functions
All Activities	Cell Phone Service	306	\$44.00	\$13,464	State Contract	Cell Phones for field staff communication with district office, plugging contractors, and landowners (16 Initial Grant Field Inspectors × 9 months × \$44/month, 27 New Field Inspectors × 6 months × \$44/month)
All Activities	Davis-Bacon Act Compliance Software	4	\$5,225.00	\$20,900	State Contract	Software for collection and review of Davis-Bacon Certified Payrolls (Software as a Service vendor eComply Solutions)
All Activities	Adobe Acrobat Software License	1	\$66.00	\$66	State Contract	Software for producing reports and Davis-Bacon Compliance Requests to Dept of Labor.
Well Plugging	FLIR camera tripods	10	\$181.00	\$1,810	Vendor Quote	One-time cost for new cameras that detect and measure methane emissions at well sites
<b>Fiscal Year 2024 Total</b>						
				<b>\$124,324</b>		
<b>Fiscal Year 2025</b>						
All Activities	Cell Phone Service	258	\$44.00	\$11,352	State Contract	Cell Phones for field staff communication with district office, plugging contractors, and land owners (43 Field Inspectors × 6 months × \$44/month)
All Activities	Davis Bacon Compliance Software	4	\$5,225.00	\$20,900	State Contract	Software for collection and review of Davis-Bacon Certified Payrolls (Software as a Service vendor eComply Solutions)
All Activities	Adobe Acrobat Software License	1	\$66.00	\$66	State Contract	Software for producing reports and Davis-Bacon Compliance Requests to Dept of Labor.
<b>Fiscal Year 2025 Total</b>						
				<b>\$32,318</b>		
<b>Fiscal Year 2026</b>						
				<b>\$0</b>		
<b>Fiscal Year 2026 Total</b>						
				<b>\$0</b>		
<b>Fiscal Year 2027</b>						
				<b>\$0</b>		
<b>Fiscal Year 2027 Total</b>						
				<b>\$0</b>		
<b>Fiscal Year 2028</b>						
				<b>\$0</b>		
<b>Fiscal Year 2028 Total</b>						
				<b>\$0</b>		
<b>PROJECT TOTAL</b>						
				<b>\$156,642</b>		

**Additional Explanation (as needed):** Some computers and trucks were purchased with the Initial Well Plugging Grant so the quantities listed above are for the new personnel and new trucks necessary to scale up workforce for the Phase I of the Formula Grant. With the exception of the Davis-Bacon Compliance Software, this is standard equipment that RRC provides to our Field Inspectors. Field Inspectors travel to remote locations across the state which have potentially hazardous conditions.

## Detailed Budget Justification

### f. Contractual

Workplan Activity	Sub-Recipient Name/Organization	Purpose and Basis of Cost	Fiscal Year 2024	Fiscal Year 2025	Fiscal Year 2026	Fiscal Year 2027	Fiscal Year 2028	Project Total
								\$0
		<b>Sub-total</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>
Workplan Activity	Vendor Name/Organization	Purpose and Basis of Cost	Fiscal Year 2024	Fiscal Year 2025	Fiscal Year 2026	Fiscal Year 2027	Fiscal Year 2028	Project Total
Plugging Wells	Multiple Vendors - To Be Determined	Plug orphaned oil and gas wells, cost is based on projected cost for 750 wells in FY 2024 and 1,100 wells in 2025 based on FY 2023 cost in each district with 10% cost increase for inflation and additional vendors expected with new RFQ.	\$27,608,641	\$42,097,741	\$0	\$0	\$0	\$69,706,382
Site Cleanup	Multiple Vendors - To Be Determined	Remediation oil and gas wells sites, cost is based on historical cost of routine cleanups with 50 sites cleaned up each year.	\$1,000,000	\$1,000,000	\$0	\$0	\$0	\$2,000,000
		<b>Sub-total</b>	<b>\$28,608,641</b>	<b>\$43,097,741</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>	<b>\$71,706,382</b>
Workplan Activity	Name/Organization	Purpose and Basis of Cost	Fiscal Year 2024	Fiscal Year 2025	Fiscal Year 2026	Fiscal Year 2027	Fiscal Year 2028	Project Total
								\$0
		<b>Sub-total</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>
	<b>Total Contractual</b>		<b>\$28,608,641</b>	<b>\$43,097,741</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>	<b>\$71,706,382</b>

**Additional Explanation (as needed) as to procurement policies and methods used:** RRC procures goods and services following the Texas Government Code and Texas Comptroller rules established in the Texas Administrative Code. A copy of the RRC Procurement and Contract Management Guide is available at <https://www.rrc.texas.gov/media/cs4lxu3w/rrc-contract-management-guide.pdf> RRC amended the contracts with the eight existing contractors working on the Initial Grant well pluggings. New RFQ to add additional well plugging contractors is in the solicitation process and contracts with new well plugging contractors are expected to be in place by March 1, 2024. Site Remediation cleanups were not done with Initial Grant funds. Contracts with existing cleanup contractors have been amended with the federal requirements. A RFQ to add additional cleanup contractors is in the solicitation process with a target of March 1, 2024 for new contracts to be in place.

## Detailed Budget Justification

### g. Construction

Overall description of construction activities:

Workplan Activity	General Description	Cost	Basis of Cost	Justification of need
<b>Fiscal Year 2024</b>				
	<b>Fiscal Year 2024 Total</b>	<b>\$0</b>		
<b>Fiscal Year 2025</b>				
	<b>Fiscal Year 2025 Total</b>	<b>\$0</b>		
<b>Fiscal Year 2026</b>				
	<b>Fiscal Year 2026 Total</b>	<b>\$0</b>		
<b>Fiscal Year 2027</b>				
	<b>Fiscal Year 2027 Total</b>	<b>\$0</b>		
<b>Fiscal Year 2028</b>				
	<b>Fiscal Year 2028 Total</b>	<b>\$0</b>		
	<b>PROJECT TOTAL</b>	<b>\$0</b>		

Additional Explanation (as needed): RRC does not anticipate any construction will be necessary for phase one of the formula grant.

## Detailed Budget Justification

### h. Other Direct Costs

Workplan Activity	General Description and Workplan Task #	Cost	Basis of Cost	Justification of need
<b>Fiscal Year 2024</b>				
	Fiscal Year 2024 Total	\$0		
<b>Fiscal Year 2025</b>				
	Fiscal Year 2025 Total	\$0		
<b>Fiscal Year 2026</b>				
	Fiscal Year 2026 Total	\$0		
<b>Fiscal Year 2027</b>				
	Fiscal Year 2027 Total	\$0		
<b>Fiscal Year 2028</b>				
	Fiscal Year 2028 Total	\$0		
	PROJECT TOTAL	\$0		

Justify each cost listed above with detailed explanation: RRC does not anticipate any expenditures to fall into this category

# Detailed Budget Justification

## i. Indirect Costs

	Fiscal Year 2024	Fiscal Year 2025	Fiscal Year 2026	Fiscal Year 2027	Fiscal Year 2028	Total	Explanation of BASE
<b>Provide ONLY Applicable Rates:</b>							
NICRA: Fixed Provisional, Carry-Forward	0.00%	0.00%	0.00%	0.00%	0.00%		
De Minimis (10% MTDC)	0.00%	0.00%	0.00%	0.00%	0.00%		
Cost Allocation Plan (CAP)							
OTHER Indirect Rate	0.00%	0.00%	0.00%	0.00%	0.00%		
<b>Indirect Costs (As Applicable):</b>							
NICRA: Fixed Provisional, Carry-Forward						\$0	
De Minimis						\$0	
Cost Allocation Plan (CAP)							
OTHER Indirect Costs						\$0	
<b>Total indirect costs requested:</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>	

A federally approved indirect rate agreement, or rate proposed (supported and agreed upon by AQD for estimating purposes) is required if reimbursement of indirect costs is requested. Please check (X) one of the options below and provide the requested information if it has not already been provided as requested, or has changed.

An indirect rate has been approved or negotiated with a federal government agency. A copy of the latest rate agreement is included with this application, and will be provided electronically to the Financial Assistance Officer for this project.

There is not a current, federally approved rate agreement negotiated and available\*.

\*When this option is checked, the entity preparing this form shall submit a copy of its cost allocation plan or indirect cost rate proposal submitted to the cognizant agency being proposed for use in performance of the proposed project. Additionally, any non-Federal entity that has never received a negotiated indirect cost rate or has an expired rate, except for those non-Federal entities described in Appendix VII to Part 200—States and Local Government and Indian Tribe Indirect Cost Proposals, paragraph D.1.b, may elect to charge a de minimis rate of 10% of modified total direct costs (MTDC) which may be used indefinitely. As described in §200.403 Factors affecting allowability of costs, costs must be consistently charged as either indirect or direct costs, but may not be double charged or inconsistently charged as both. If chosen, this methodology once elected must be used consistently for all Federal awards until such time as a non-Federal entity chooses to negotiate for a rate, which the non-Federal entity may apply to do at any time.

**You must provide an explanation (below or in a separate attachment) and show how your indirect cost rate was applied to this budget in order to come up with the indirect costs shown.**

The Commission has an Indirect Cost Rate of 52.27% approved by DOI in July 2023 for the RRC fiscal year 2024. However, RRC will not charge indirect costs to this project to remain with the 10 percent administrative expenses cap. Please advise if you would like a copy of the NICRA.

## Detailed Budget Justification

### Administrative Costs

Cost Category	Type (Direct or Indirect)	Cost item	Unit of Cost	Administrative Cost	Fiscal Year 2024	Fiscal Year 2025	Fiscal Year 2026	Fiscal Year 2027	Fiscal Year 2028	Total Admin Cost
