Dear Rules Coordinator,

I believe oil and gas wells that are no longer operational or productive should be properly plugged, closed, and removed from private property when appropriate. Property owners should not have to carry the burden or potential risks of abandoned or inactive wells on their land.

Oil and gas companies should be held responsible for maintaining their wells and properly closing them when they are no longer in use. Protecting private property, public safety, and the environment should be a priority. I support stronger regulations that prevent companies from leaving inactive wells behind for years without accountability.

Thank you,
Emily Sanchez
