PUMPOVER FEE

All shipments from Energy Transfer's Midland Terminal Complex (as defined below) to (a) any outgoing long-haul pipeline not owned by Energy Transfer LP or its affiliates, (b) any terminal not owned by Energy Transfer LP or its affiliates, or (c) the legacy Centurion Midland terminal, will incur a fee of [I] **twelve and ninety-three hundredths cents (12.93¢) per barrel**. Such fee will be in addition to transportation rates published in applicable tariffs. No deduction for shipment shall be made by Carrier to cover evaporation and loss during transportation under this section. "Energy Transfer's Midland Terminal Complex" includes Energy Transfer's terminals commonly referred to as "Sun Midland" and "PET Midland." For the avoidance of doubt, shipments from one location in Energy Transfer's Midland Terminal Complex to another location within Energy Transfer's Midland Terminal Complex will not be charged the fee set above.

The rates payable to Carrier for the Services, including receipt at the Connection Points and transportation of Crude Oil on Carrier’s Gathering System to the Delivery Point(s), shall be calculated using the average daily deliveries across all Connection Points in barrels per day over the relevant month, and shall be set as forth:

From Vermejo Gathering Locations	To	Tier	Gathering Rate** (cents per barrel)
Loving County, TX Reeves County, TX Ward County, TX	Plains Pipeline Interconnect	For the 1 st bpd to the 6,000 th bpd	[I] 107.08
		For the 6,001 st bpd to the 12,000 th bpd	[I] 91.78
		For the 12,001 st bpd to the 18,000 th bpd	[I] 66.29
		For the 18,001 st bpd to the 24,000 th bpd	[I] 50.99
		For the 24,001 st bpd and above	[I] 35.69

** Carrier shall have the right, beginning on July 1, 2026, and every July 1 thereafter, to increase the tiered gathering rates up to three and one-half percent (3.5%) annually to reflect any increases in the Producer Price Index – Finished Goods (PPI-FG). For the avoidance of doubt, if at any time there is a decrease in the PPI-FG, the tiered gathering rates will not be reduced to reflect such decrease.

All charges and rates in this tariff, except where noted, are subject to increase each July 1 in accordance with the indexing mechanism set forth in FERC regulation 18 C.F.R. Section 342.3; provided that rate will not be subject to decrease if the indexing mechanism decreases the rate below the initial rate.

Notwithstanding Rule 31. D and Rule 31. E of Carrier’s TX No. 60.0.0 to the contrary, (1) a deduction of two-tenths of one percent (0.2%) (the “PLA”) will be made to cover evaporation, interface losses, and other normal losses during transportation; provided, that any movement from any gathering point to Brook Station that continues on the same movement to Midland, Texas shall only be charged one PLA with respect to the entire movement from the gathering point to Midland, Texas, and (2) any movement from any gathering point to Brook Station that continues on the same movement to Midland, Texas shall only be subject to a single gravity deduction pursuant to the table set forth in Rule 31.E.
