Comments concerning proposed rulemakings
In reading through the proposed rules and regulations I do not see a simple way that this helps the landowner with inactive gas wells that have not been in production for a number of years. Currently I have 3 wells that are not been in production in over 10 years and 2 gas wells that have been abandoned by the operator as he passed away a number of years ago.

It appears that the rules are being drafted to protect the operators and not solve the issue of orphaned or abandoned wells for the landowner.
